16 CHANGES TO THE FINAL REPORT RESULTING FROM COMMENTS ON THE DRAFT REPORT

16.1 Introduction

The Authority and FRA widely circulated the Draft Supplemental EIR/EIS to affected local jurisdictions, state and federal agencies, tribes, community organizations, other interest groups, and interested individuals. The document was also available at Authority offices, public libraries, and community centers. The 60-day public comment period closed on January 16, 2018. During this period, a public hearing was held on December 19, 2017 in Bakersfield to receive oral testimony on the Draft Supplemental EIR/EIS. This Final Supplemental EIR addresses the comments received during the Draft Supplemental EIR/EIS comment period.

Global changes made to the final document are described in Section 1.2 of this Technical Appendix. Section and chapter-specific changes to Volume I of the Draft Supplemental EIR/EIS text are described in Section 1.3 of this Technical Appendix. Changes to the Technical Appendices of the Draft Supplemental EIR/EIS are described in Section 1.4 of this Technical Appendix.

Text added to the document is shown in grey highlight, while text removed from the document is shown in strikethrough. Changes made to the front matter of the Draft Supplemental EIR/EIS including the Preface, Fact Sheet, and Summary are not described in this technical appendix because they are reproduced here in this Final Supplemental EIR.

16.2 Global Changes

Several text changes were made globally throughout the Final Supplemental EIR. These include the following:

- The word Draft was replaced with Final in references to the Supplemental EIR document, except when the reference was specifically to the Draft document.
- The decision was made to bifurcate the CEQA and NEPA documents, so all references to the FRA as the NEPA lead agency for the Supplemental EIS were removed. This is a standalone Final Supplemental EIR.
- To clarify that this document is a standalone CEQA Final Supplemental EIR, a notice has been added to the footer on the first page of each section and chapter as seen below on this page. The footer states the following: This Final Supplemental EIR is prepared by the Authority pursuant to its responsibilities as a lead agency under CEQA. This Final Supplemental EIR does not specifically address FRA’s NEPA compliance and should not be understood to substitute for a separate Final Supplemental EIS.
- Throughout the document, the GIS data remained unchanged; however, the pathways on which the files were saved had been modified for a number of figures. The file pathways are shown as vertical text to the left of the image, and for those figures that required pathway changes, the figure title was shaded grey. This data change does not modify the footprint or the disturbance areas, so the analysis presented in this Final Supplemental EIR is consistent with the analysis presented in the Draft Supplemental EIR/EIS.
- Dates on all documents were changed to reflect the publication date of the Final Supplemental EIR.
- All references to a 45-day review period for the Draft Supplemental EIR/EIS were changed to accurately describe the 60-day review period for the Draft Supplemental EIR/EIS.
Chapter 16
Changes to the Final Report Resulting from Comments on the Draft Report

16.3 Volume I

16.3.1 Chapter 1

On page 1-7, Figure 1-2 Fresno to Bakersfield Section Final EIR/EIS Preferred Build Alternative had changed GIS pathways.

On page 1-8 Figure 1-3 Locations of F-B Section EIR/EIS Alternatives, F-B LGA, and May 2014 Project had changed GIS pathways.

There were no other changes to Chapter 1 aside from the global changes described in Section 16.2 of this Chapter.

16.3.2 Chapter 2

On page 2-6 of the Draft Supplemental EIR/EIS the clause “adjacent to the Amtrak station” was added to clarify the following sentence: The May 2014 Project Station would be built at the corner of Truxtun and Union Avenues/SR 204 adjacent to the Amtrak station (Figure 2-1).

On page 2-7, Figure 2-1 F-B LGA and May 2014 Project was revised to accurately portray the location of the MOIF as shown here.

On page 2-8, Figure 2-2 F-B LGA and Associated Features had changed GIS pathways.

On page 2-9 of the Draft Supplemental EIR/EIS the clause “and the maximum height of the viaduct is 73 feet in the vicinity of Weill Park in Bakersfield” was added to the following sentence:
The average height of the viaduct is 60 feet above existing ground and the maximum height of the viaduct is 73 feet in the vicinity of Weill Park in Bakersfield.

On page 2-9 of the Draft Supplemental EIR/EIS the following text was added to footnote 3: The fill requirements are expected to be similar for the F-B LGA and May 2014 Project due to the total length of each alternative on embankment/at-grade or on retained fill (approximately 12.5 miles for the F-B LGA and 11.3 miles for the May 2014 Project). Therefore, the assumption of fill requirements for the Fresno to Bakersfield Section, as stated in the Final EIR/EIS, is still applicable to the F-B LGA and would not exceed the available permitted aggregate resources in the San Joaquin Valley. Borrow sites for excavated fill have not been identified to date. The contractor will acquire fill from sites that are permitted under the Surface Mining and Reclamation Act (SMARA) or exempt under SMARA.

On page 2-11, Figure 2-3 F-B LGA in Kern County and Shafter had changed GIS pathways.

On page 2-12, Figure 2-4 F-B LGA in Shafter and Kern County had changed GIS pathways.

On page 2-13, Figure 2-5 F-B LGA in Shafter had changed GIS pathways.

On page 2-14, Figure 2-6 F-B LGA in Bakersfield and Oildale had changed GIS pathways.

On page 2-15, Figure 2-7 F-B LGA in Oildale and Bakersfield had changed GIS pathways.

On page 2-16, Figure 2-8 F-B LGA in Bakersfield had changed GIS pathways.

On page 2-31 of the Draft Supplemental EIR/EIS at the end of the third paragraph, the following footnote was added:

This document evaluates impacts, and proposed mitigation if necessary, of the HSR alignment all the way to Oswell Street to disclose impacts of the tracks as they might extent to the southeast beyond the F Street Station. However, the Authority and FRA intend to approve for construction and operation, as part of this document, only the F Street station and the alignment from that station towards Fresno, as shown in Figure S-4. Any alignment to the southeast of the station would be approved, if at all, following environmental evaluation of the Bakersfield to Palmdale Section, currently programmed to be completed via an EIR/EIS for that Section in 2020. Accordingly, mitigation measures for impacts related to the alignment southeast of the F street station would be imposed as part of the approval of the Bakersfield to Palmdale Section.

On page 2-29, Figure 2-15 Bakersfield F Street Station Conceptual Layout had changed GIS pathways.

On page 2-31 of the Draft Supplemental EIR/EIS the clause ", serving all vehicles (private vehicles, taxis, and public transit)" was added to the following sentence: Chester Avenue/32nd Street: This would be the third access location to the station and would operate as a right-in/right-out-only driveway, serving all vehicles (private vehicles, taxis, and public transit).

On page 2-32 of the Draft Supplemental EIR/EIS, the following sentence was added: Traveling on city streets, the Amtrak station is located approximately 1.8 miles from the proposed F Street Station site.

Table 2-2 HSR System Ridership Forecasts (in millions per year), on page 2-40 of the Draft Supplemental EIR/EIS, was corrected in the following ways:

<table>

<td>40.2</td>
</tr>
</tbody>
</table>

Table 2-1 HSR System Ridership Forecasts (in millions per year)
On page 2-44 of the Draft Supplemental EIR/EIS the following paragraph was added: The 2018 Business Plan affirms the Authority’s commitment to connecting the Silicon Valley to the Central Valley (from San Francisco to Bakersfield) as quickly as possible. The Authority is considering options to deliver early benefits along the Phase 1 corridor, which may include the development of an interim terminal station at the Preferred Alternative station location (F Street). More information about the interim terminal station is contained in Technical Appendix 2-I of this Final Supplemental EIR.

16.3.3 Section 3.1

There were no changes to Section 3.1 aside from the global changes described in Section 16.2 of this Chapter.

16.3.4 Section 3.2

On page 3.2-2 of the Draft Supplemental EIR/EIS the following sentence was added at the end of Section 3.2.1.3: Metropolitan Bakersfield High Speed Rail Terminal Impact Analysis Report (KernCOG 2003), Metropolitan Bakersfield Transit Center Study (KernCOG 2015), Metropolitan Bakersfield General Plan Circulation Element (City of Bakersfield and County of Kern 2007), and Kern County General Plan (Kern County 2009) have also been referenced in the preparation of this analysis.

On page 3.2-2 of the Draft Supplemental EIR/EIS the following sentences were added to Section 3.2.2 after the second sentence of the section: Additionally, the project will not result in any increase in regional vehicle miles traveled (VMT) since the increase in VMT will be at a local level between local destinations and the F Street station. As such, at a regional level, the project will reduce VMT because long-range destination vehicular trips will be replaced by passengers using HSR.

On page 3.2-6 of the Draft Supplemental EIR/EIS the following changes were made to Section 3.2.3.1 under “Air Travel”: Bakersfield Meadows Field provides commercial service to San Francisco, Denver, and Phoenix and Los Angeles.

On page 3.2-10, Figure 3.2-1 City of Shafter Study Intersections had changed GIS pathways.

On page 3.2-12, Figure 3.2-2 City of Shafter Roadway Segments had changed GIS pathways.

On page 3.2-13, Figure 3.2-3 City of Shafter Existing Intersection Levels-of-Service had changed GIS pathways.

On page 3.2-16, Figure 3.2-4 Kern County Study Intersections had changed GIS pathways.

On page 3.2-17, Figure 3.2-5 Kern County Roadway Segments had changed GIS pathways.

On page 3.2-19, Figure 3.2-6 Kern County Existing Intersection Levels-of-Service had changed GIS pathways.

On page 3.2-20 of the Draft Supplemental EIR/EIS, Table 3.2-6 was revised in the following ways:

Table 3.2-2 Existing Intersection Levels-of-Service – City of Bakersfield

Source: Authority and FRA, 2017

Delay = Average control delay in seconds (For two-way stop controlled intersections, reported delay is for worst-case movement).

**BOLD** = Exceeds LOS standard

LOS = levels-of-service

TWSC = two-way stop-controlled

On page 3.2-21, Figure 3.2-7 City of Bakersfield Study Intersections had changed GIS pathways.

On page 3.2-22, Figure 3.2-8 City of Bakersfield Roadway Segments had changed GIS pathways.

On page 3.2-23, Figure 3.2-9 City of Bakersfield Existing Intersection Levels-of-Service had changed GIS pathways.

On page 3.2-24 of the Draft Supplemental EIR/EIS in the Highways and Roadways subsection of the Bakersfield Study Area section of Section 3.2.3.2: the clause “however, these projects are not funded and may still require adoption of the corridors” was removed from the following sentence: Several new freeway corridors are included in the Metropolitan Bakersfield General Plan; however, these projects are not funded and may still require adoption of the corridors (City of Bakersfield and Kern County 2015).

On page 3.2-24 of the Draft Supplemental EIR/EIS the following sentences were added to the Highways and Roadways subsection of the Bakersfield Study Area section of Section 3.2.3.2: With the exception of the Centennial Corridor project, which is funded and currently under construction, the rest of the projects may still require adoption and funding for implementation of these projects. As such, for purposes of this analysis, these projects have been considered under the Future (2035) scenario analysis since they are included in the local and regional long-range transportation plans.

On page 3.2-24 of the Draft Supplemental EIR/EIS in the Air Travel subsection of the Bakersfield Study Area section of Section 3.2.3.2: the following changes were made: Bakersfield Meadows Field Airport provides commercial service to San Francisco, Denver and Los Angeles Phoenix.

On page 3.2-25, Figure 3.2-10 Regionally Significant Roads in Bakersfield was updated to account for regionally significant roads.

On page 3.2-26, Figure 3.2-11 Bakersfield Station Study Area Roadway Classifications Roadway Segment Analysis had changed GIS pathways.

On page 3.2-27 of the Draft Supplemental EIR/EIS the following changes were made: A total of 6,364 roadway segments were identified for analysis.

On page 3.2-27 of the Draft Supplemental EIR/EIS reference to the Metropolitan Bakersfield General Plan Circulation Element in Table 3.2-7 was corrected in the following way: (December 2007–September 2009).

On page 3.2-28, Figure 3.2-12 Bakersfield Station Area Roadway Segments was updated for visual clarity.

On page 3.2-29, Figure 3.2-13 Bakersfield Station area Roadway Segments was updated for visual clarity.

On page 3.2-30, Figure 3.2-14 Bakersfield Station Area Study Intersections was updated for visual clarity.

On page 3.2-31, Figure 3.2-15 Bakersfield Station Area Intersections Levels-of-Service was updated for visual clarity.
On page 3.2-36, Figure 3.2-16 Future (2035) Plus Truxtun Avenue Station Intersection Levels-of-Service had changed GIS pathways.

On page 3.2-37 of the Draft Supplemental EIR/EIS in Section 3.2.4.2 the following changes were made: vehicle miles traveled (VMT).

On page 3.2-37 of the Draft Supplemental EIR/EIS in subsection Aviation Element of Section 3.2.4.2 the following changes were made: Although enplanements have grown in number nationally and statewide (at major airports), within the proposed HSR service area, Bakersfield Airport currently serves San Francisco, Denver, and Phoenix-Los Angeles international airports with a limited number of flights each day.

On page 3.2-38 of the Draft Supplemental EIR/EIS reference to the Metropolitan Bakersfield General Plan Circulation Element in Table 3.2-10 was corrected in the following way: (December 2007 - September 2009).

On page 3.2-39 of the Draft Supplemental EIR/EIS reference to the Metropolitan Bakersfield General Plan Circulation Element in Table 3.2-12 was corrected in the following way: (December 2007 - September 2009).

On page 3.2-40 of the Draft Supplemental EIR/EIS, Table 3.2-15 was revised in the following ways:

On page 3.2-43 of the Draft Supplemental EIR/EIS the words “new interchanges, addition of” was added to the following sentence: However, due to the proposed alignment, modifications would be required to the existing circulation system that includes roadway closures, realignment, redesign of existing interchanges, addition of new interchanges, addition of new traffic signals and roadway widening.

On page 3.2-44 of the Draft Supplemental EIR/EIS, the following changes were made:

- For the F-B LGA, there would be no significant impacts due to the project on any roadway segments under future plus project conditions.

- The following two study intersections would experience significant impacts under future plus project conditions that would experience significant impacts:
  - SR 43 and Ash Avenue (a.m. and p.m. peak hours)
  - Beech Avenue and Riverside Street (p.m. peak hour)

Figure 3.2-17 shows the future (2035) plus build peak hour intersection LOS for the City of Shafter.

- Kern County
  - For the F-B LGA, there would be no significant impacts due to the project on any roadway segments or intersections under existing plus F-B LGA conditions.
  - There would be The following two study intersections would experience significant impacts under future plus project that would experience significant impacts. Those intersections are:
• Dole Court and Snow Road (a.m. peak hour)
• Norris Road and Snow Road (p.m. peak hour)

Figure 3.2-18 shows the future (2035) plus build peak hour intersection LOS for Kern County.

• City of Bakersfield
  - For the F-B LGA, there would be no significant impacts due to the project on any roadway segments or intersections under existing plus F-B LGA conditions.
  - For the F-B LGA, there would be no significant impacts due to the project on any roadway segments or intersections under future plus project conditions. There would be two study intersections under future plus project that would experience significant impacts.
  - Figure 3.2-19 shows the future (2035) plus build peak hour intersection LOS for the City of Bakersfield.

• Bakersfield Station Area
  - One roadway segment would experience a significant impact under existing plus F-B LGA Station conditions. That segment is:
    - Mohawk Street and Hageman Road (a.m. and p.m. peak hours)
  - The following three study intersections would experience a significant impact under existing plus F-B LGA Station conditions:
    - Mohawk Street and Hageman Road (a.m. and p.m. peak hours)
    - SR 99 Southbound Ramps and Olive Drive (a.m. peak hour)
    - F Street and 23rd Street (a.m. and p.m. peak hours)
  - There would be no significant impacts to freeway segments under existing plus F-B LGA Station conditions.
  - One roadway segment would experience a significant impact under future plus F-B LGA Station conditions:
    - F Street, between 30th Street and 24th Street
  - The following nine study intersections would experience a significant impact under future plus F-B LGA Station conditions:
    - Mohawk Street and Hageman Road (a.m. peak hour)
    - Mohawk Street and Rosedale Highway (a.m. and p.m. peak hours)
    - Oak Street and Rosedale Highway-24th Street (a.m. and p.m. peak hours)
    - Oak Street and Truxtun Avenue (a.m. peak hour)
    - F Street and 24th Street (p.m. peak hour)
    - F Street and 23rd Street (a.m. and p.m. peak hours)
    - M Street and Golden State Avenue and 28th Street (a.m. and p.m. peak hours)
    - Union Avenue and California Avenue (p.m. peak hour)
    - Beale Avenue and Jefferson Street-SR 178 Westbound Ramps (p.m. peak hour)

On page 3.2-45, Figure 3.2-17 Future (2035) Plus Build Peak Hour Intersection Levels-of-Service for the City of Shafter had changed GIS pathways.
On page 3.2-46, Figure 3.2-18 Future (2035) Plus Build Peak Hour Intersection Levels-of-Service for the Kern County had changed GIS pathways.

On page 3.2-47, Figure 3.2-19 Future (2035) Plus Build Peak Hour Intersection Levels-of-Service for the City of Bakersfield had changed GIS pathways.

On page 3.2-48, Figure 3.2-20 Future (2035) Plus Build Peak Hour Intersection Levels-of-Service for the Bakersfield Station Area had changed GIS pathways.

On page 3.2-55 of the Draft Supplemental EIR/EIS reference to the Metropolitan Bakersfield General Plan Circulation Element in Table 3.2-18 was corrected in the following way: (December 2007September 2009).

On page 3.2-55 of the Draft Supplemental EIR/EIS, the following changes were made to the second paragraph: the bookmark self-reference error was corrected to Table 3.2-19.

On page 3.2-57 of the Draft Supplemental EIR/EIS the following changes were made:
- SR 43 and Los Angeles AvenueAsh Avenue (a.m. and p.m. peak hours)

On page 3.2-60 of the Draft Supplemental EIR/EIS the following paragraph was added to Impact TR #13: Roadway segments project trip distribution and assignment for the F-B LGA were obtained from Kern COG MIP Travel Demand Model Select Zone run. Based on the select zone distribution, it is estimated that 70 percent of project trips are forecasted to access the station from the south, via F Street and SR 204. Approximately 24 percent of project trips will travel westward along SR 204, 16 percent will travel eastward along SR 204 and 30 percent of locally generated trips will travel southward along F Street. The remaining 30 percent of total project trips are forecasted to access the station through two access points on Chester Avenue along 34th Street and 32nd Street. Out of these trips, approximately 4 percent will travel northward along Chester Avenue, 13 percent will travel southward along Chester Avenue and approximately 13 percent will travel eastward along 34th Street.

In the second paragraph of page 3.2-63 of the Draft Supplemental EIR/EIS the following changes were made: Therefore, the identified effects to roadway segments, intersections would be significant under CEQA.

On page 3.2-68 of the Draft Supplemental EIR/EIS the following changes were made to Section 3.2.6:

3.2.6 Mitigation Measures

This section lists the mitigation measures that are applicable to the May 2014 Project and the F-B LGA. Section 3.2.6.1 lists all the mitigation measures that are applicable to the May 2014 Project and the F-B LGA. Section 3.2.6.2 lists only the mitigation measures that are common to both the F-B LGA and the May 2014 Project. Section 3.2.6.3 lists the mitigation measures that are only applicable to the F-B LGA.

On page 3.2-68 of the Draft Supplemental EIR/EIS the following changes were made to Section 3.2.6.1: The project design features for the May 2014 Project were approved under the Fresno to Bakersfield Section Final EIR/EIS, and detailed descriptions of each feature can be found in the Final EIR/EIS (Authority and FRA 2014a, pages 3.2-121 to 3.2-124).

On page 3.2-68 of the Draft Supplemental EIR/EIS the following changes were made to the subsection Mitigation Measures: The only new mitigation measure added specifically for the F-B LGA is TR-MM#10. Based on the updated analysis conducted for the May 2014 Project, TR-MM#2 through TR-MM#9 provides adequate mitigation for the updated May 2014 Project. Additionally, based on the analysis conducted for the F-B LGA, these measures approved for the May 2014 Project and TR-MM#10 provided adequate mitigation for the project as modified in the F-B LGA.

On page 3.2-69 of the Draft Supplemental EIR/EIS the following bullet point was added:
• **TR-MM#9.** 30th Street between F Street and H Street: Eliminate on-street parking to convert 30th Street from 2-lane Collector to 4-Lane Collector.

On page 3.2-69 of the Draft Supplemental EIR/EIS the following bullet point was removed:

- **TR-MM#3.** F Street and 30th Street: Install a traffic signal at the intersection.

On page 3.2-70 of the Draft Supplemental EIR/EIS the following changes were made:

- **TR-MM#2.** F Street and 30th Street: Add overlap phasing for westbound right-turn lane.

On page 3.2-70 of the Draft Supplemental EIR/EIS the following bullet point was removed:

- **TR-MM#6, 7, 8.** F Street and 23rd Street: Widen the eastbound approach to provide one exclusive left-turn lane, two exclusive through lanes, and one shared through/right-turn lane.

On page 3.2-70 of the Draft Supplemental EIR/EIS the following changes were made:

- **TR-MM#6, 7, 8.** Oak Street and Rosedale Highway-24th Street: Widen the eastbound approach to provide one exclusive left-turn lane, three exclusive through lanes, and one exclusive right-turn lane. Add overlap phasing for westbound right-turn lane and re-time the signal in the a.m. and p.m. peak hours.

On page 3.2-70 of the Draft Supplemental EIR/EIS the following bullet point was removed:

- **TR-MM#5.** Union Avenue and California Avenue: Re-time the signal in the p.m. peak hour.

On page 3.2-70 of the Draft Supplemental EIR/EIS the following bullet point was removed:

- **TR-MM#3.** Beale Avenue and Jefferson Street-SR 178 Westbound Ramps: Install a traffic signal at the intersection.

On page 3.2-71 of the Draft Supplemental EIR/EIS the following changes were made to Section 3.2.6.2:

3.2.6.2 Mitigation Measures **Specific to the F-B LGA** Applicable to both the F-B LGA and May 2014 Project

The F-B LGA will include engineering design features that would alleviate traffic conditions adjacent to the F Street Station site. Additional information regarding project design features is included in Chapter 2.0 of the Draft Supplemental EIR/EIS. Following are a list of mitigation measures applicable both to the F-B LGA and the May 2014 Project.

**Mitigation Measures under Future (2035) Plus Project Conditions**

- **TR-MM#8, 9.** SR 43 and Ash Avenue: Add a two-way left-turn lane on SR 43.
- **TR-MM#10.** Beale Avenue and Riverside Street: Convert to all-way stop control.
- **TR-MM#10.** Dole Court and Snow Road: Convert to all-way stop control.
- **TR-MM#3.** Norris Road and Snow Road: Install a traffic signal at the intersection.
- **TR-MM#3.** Beale Avenue and Jefferson Street-SR 178 Westbound Ramps: Install a traffic signal at the intersection.
- **TR-MM#6, 7.** M Street and SR 204 and 28th Street: Widen the northbound approach to provide an exclusive left-turn lane and shared through/right-turn lane at the intersection.
- **TR-MM#5.** Oak Street and Truxtun Avenue: Re-time the signal in the p.m. peak hour.
- **TR-MM#6, 7, 8.** F Street and 23rd Street: Widen the eastbound approach to provide one exclusive left-turn lane, two exclusive through lanes, and one shared through/right-turn lane.
- **TR-MM#5.** Union Avenue and California Avenue: Re-time the signal in the p.m. peak hour.

On page 3.2-71 of the Draft Supplemental EIR/EIS the following changes were made to Section 3.2.6.2:
3.2.6.3 Mitigation Measures Specific to the F-B LGA

The F-B LGA will include engineering design features that will alleviate traffic conditions adjacent to the F Street Station site. Additional information regarding the project design is included in Chapter 2.0 of this the Draft Supplemental EIR/EIS. Following is a list of mitigation measures specifically applicable to the F-B LGA.

Specific mitigation measures (or portions of the measures) (TR-MM#3 through TR-MM#9) developed for Transportation in the F-B LGA TATR (Authority and FRA 2017), as listed in Table 3.2-31, are applicable to the F-B LGA. These measures include TR-MM#3 through TR-MM#9. The only new mitigation measure added specifically for the F-B LGA is TR-MM#10. Table 3.2-32 lists the mitigation measures for Transportation developed solely for the F-B LGA.

Table 3.2-6 Transportation Mitigation Measures

Mitigation Measures under Existing Plus Project Conditions

- **TR-MM#8**, 9. SR 43 and Ash Avenue: Add a two-way left-turn lane on SR 43.
- **TR-MM#10**. Beech Avenue and Riverside Street: Convert to all-way stop control.
- **TR-MM#10**. Dole Court and Snow Road: Convert to all-way stop control.
- **TR-MM#3**. Mohawk Street and Hageman Road: Install a traffic signal at the intersection.
- **TR-MM#3**. SR 99 Southbound Ramps and Olive Drive: Install a traffic signal at the intersection.
- **TR-MM#6**, 7, 8. F Street and 23rd Street: Widen the eastbound approach to provide one exclusive left-turn lane, two exclusive through lanes, and one shared through/right-turn lane.
- **TR-MM#9**. 30th Street between F Street and H Street: Eliminate on-street parking to convert 30th Street from 2-lane Collector to 4-Lane Collector.

Mitigation Measures under Future (2035) Plus Project Conditions

- **TR-MM#3**. Mohawk Street and Hageman Road: Install a traffic signal at the intersection.
- **TR-MM#4**. Mohawk Street and Rosedale Highway: Add a second westbound left-turn lane. This improvement already exists but is currently closed due to construction activity at the intersection.
- **TR-MM#6**, 72, 5. Oak Street and Rosedale Highway-24th Street: Add overlap phasing for westbound right-turn lane and re-time the signal in the a.m. and p.m. peak hours. Widen the eastbound approach to provide one exclusive left-turn lane, three exclusive through lanes, and one exclusive right-turn lane.
- **TR-MM#5**. Oak Street and Truxtun Avenue: Re-time the signal in the a.m. peak hour.
- **TR-MM#5**. F Street and 24th Street: Re-time the signal in the p.m. peak hour.
- **TR-MM#8**. SR 43 north of E. Los Angeles Avenue: Widen SR 43 from 2 to 4 lanes.
16.3.5 Section 3.3

On page 3.3-4 of the Draft Supplemental EIR/EIS, the following bullet point was added:

- SB 743

On page 3.3-4 of the Draft Supplemental EIR/EIS, the following text was added:

SB 743 (2013)

On September 27, 2013, Governor Brown signed SB 743, which creates a process to change the way that transportation impacts are analyzed under CEQA. SB 743 requires the Governor's Office of Planning and Research to amend the CEQA Guidelines to provide an alternative to LOS for evaluating transportation impacts. Particularly within areas served by transit, those alternative criteria must promote the reduction of greenhouse gas emissions, the development of multimodal transportation networks, and a diversity of land uses. Measurements of transportation impacts may include vehicle miles traveled (VMT), VMT per capita, automobile trip generation rates, or automobile trips generated. Once the CEQA Guidelines are amended, auto delay will no longer be considered a significant impact under CEQA. Transportation impacts related to air quality must still be analyzed under CEQA (Office of Planning and Research 2017).

On page 3.3-8 of the Draft Supplemental EIR/EIS, the following changes were made: vehicle miles traveled (VMT).

On page 3.3-8 of the Draft Supplemental EIR/EIS, the following footnote was added: While the CARB emission factor program, EMFAC, is currently available in a 2014 version, this program version was not available at the time the analysis was originally conducted for the May 2014 Project, as reflected in the Fresno to Bakersfield Section Final EIR/EIS. The analysis in this section of the Supplemental EIR/EIS is based on EMFAC 2011 to allow for a consistent evaluation and comparison of the construction emissions for the May 2014 Project and the F-B LGA.

On page 3.3-21, Figure 3.3-2 Air Quality Monitoring Stations Closest to Project had changed GIS pathways.

16.3.6 Section 3.4

On page 3.4-2, text originally appearing on page 3.4-39 of the Draft Supplemental EIR/EIS has been relocated:

As referenced on page 3.4-9 of the Fresno to Bakersfield Final EIR/EIS, roadway improvements that are classified as Type 1 projects require the preparation of a Noise Study Report (NSR) to identify traffic noise impacts for all land uses within the project study area. Traffic noise impacts occur when predicted noise levels in the design year approach or exceed the Noise Abatement Criteria (NAC) or a predicted noise level substantially exceeds the existing without project noise level by 12 dBA or more. When traffic noise impacts are identified, feasible and reasonable noise abatement measures such as noise barriers must be considered. The NSR evaluates the acoustic feasibility of noise barriers and whether or not they can reduce noise levels by 5 dBA or more for receptors located behind the barriers. If the noise barrier is acoustically feasible (reducing noise levels by 5 dBA or more), the Authority will prepare a Noise Abatement Decision Report (NADR) after the completion of the NSR to evaluate constructability issues and determine whether the barrier is reasonable (cost-effective).

A noise barrier may be considered not feasible for various factors that include not meeting geometric standards, such as the minimum line-of-sight, safety, maintenance, security, geotechnical considerations, and utility relocations. In addition, noise barriers would be considered not feasible when they are located in front of single-family residences or along properties with pedestrian sidewalks because the maintenance of property access would be required. In addition, constructing a noise barrier in front of a single-family residence or including properties with pedestrian sidewalks would result in a non-continuous wall, which would not provide the minimum noise reduction of 5 dBA.

A noise barrier would be considered reasonable when at least one or more benefited receptor achieves a minimum noise reduction of 7 dBA and when the estimated construction cost is within...
the reasonable allowance. Other reasonableness factors include the viewpoints of the benefited receptors.

Below is a summary of the Type 1 projects within the project vicinity:

- **Poplar Avenue Grade Separation.** Land uses within the project vicinity for the Poplar Avenue Grade Separation include agricultural land and residential uses. The NSR will report the highest expected noise level that is not closer than 100 feet from the edge of the outside traffic lane for the agricultural land and determine if the residential land uses would approach or exceed the NAC.

- **Riverside Street Grade Separation.** Land uses within the project vicinity for the Riverside Street Grade Separation include agricultural land along with facilities associated with agricultural uses. Since there are no land uses within the project vicinity that have a NAC, the NSR will report the highest expected noise level that is not closer than 100 feet from the edge of the outside traffic lane.

- **SR 99/7th Standard Road Interchange.** Land uses within the project vicinity for the SR 99/7th Standard Road Interchange include a single-family residence, vacant land, agricultural land, and commercial and industrial uses. The NSR will report the highest expected noise level that is not closer than 100 feet from the edge of the outside traffic lane for vacant land, agricultural land, commercial, and industrial uses. The NSR will also determine if residential land uses would approach or exceed the NAC.

- **SR 204/F Street Interchange.** Land uses within the project vicinity for the SR 204/F Street Interchange include single-family residences and office, commercial, and industrial uses. The NSR will report the highest expected noise level that is not closer than 100 feet from the edge of the outside traffic lane for office, commercial, and industrial uses. The NSR will also determine if residential land uses would approach or exceed the NAC.

- **Tulare Avenue/Shafter Avenue Intersection.** Land uses within the project vicinity for the Tulare Avenue/Shafter Avenue intersection include residences, the Golden Living Center, a baseball field, vacant land, and industrial uses. The NSR will report the highest expected noise level that is not closer than 100 feet from the edge of the outside traffic lane for the baseball field, vacant land, and industrial uses, and determine if residences and the Golden Living Center land uses would approach or exceed the NAC.

- **Chester Avenue/34th Street Intersection.** Land uses within the project vicinity for the Chester Avenue/34th Street intersection include residences, a school, a museum, and commercial and industrial uses. The NSR will report the highest expected noise level that is not closer than 100 feet from the edge of the outside traffic lane for commercial and industrial uses. The NSR will also determine if the school, museum, and residential land uses would approach or exceed the NAC.

The above referenced text relocation does not change the findings or conclusions presented in the Draft Supplemental EIR/EIS.

On page 3.4-11, Figure 3.4-2 Noise and Vibration Level Measurement Locations (North End) had changed GIS pathways.

On page 3.4-12, Figure 3.4-3 Noise and Vibration Level Measurement Locations (South End) had changed GIS pathways.

In the second paragraph on page 3.4-15 of the Draft Supplemental EIR/EIS, the following changes were made: Appendix 3.4-AB, Noise and Vibration Measurements.

In the last paragraph on page 3.4-19 of the Draft Supplemental EIR/EIS, the following changes were made: Table 3.4-A-4 in Appendix 3.4-AB, Noise and Vibration Measurements.

In the first paragraph under Table 3.4-12 Distances to Federal Railroad Administration Noise Impact Contours from Station Construction Activities, on page 3.4-20 of the Draft Supplemental
EIR/EIS, the following changes were made: Table 3.4-A-4B-6 in Appendix 3.4-AB, Noise and Vibration Measurements.

In the first paragraph under Table 3.4-8 Distances to Federal Railroad Administration Noise Impact Contours from MOIF Construction Activities, on page 3.4-21 of the Draft Supplemental EIR/EIS, the following changes were made: Table 3.4-A-4B-6 in Appendix 3.4-AB, Noise and Vibration Measurements.

In the first paragraph under Table 3.4-9 Distances to Construction Vibration Damage Criteria, on page 3.4-24 of the Draft Supplemental EIR/EIS, the word “Measurements” was added to the following sentence: The list of construction equipment for all phases of rail corridor construction is provided in Table 3.4-B-4 in Appendix 3.4-B, Noise and Vibration Measurements.

In the fifth paragraph on page 3.4-25 of the Draft Supplemental EIR/EIS, the following changes were made: Table 3.4-A-4B-5 in Appendix 3.4-AB, Noise and Vibration Measurements.

In the first paragraph on page 3.4-26 of the Draft Supplemental EIR/EIS, the following changes were made: Table 3.4-A-4B-6 in Appendix 3.4-AB.

In the third paragraph on page 3.4-26 of the Draft Supplemental EIR/EIS, the following changes were made: Table 3.4-A-4B-7 in Appendix 3.4-AB.

In the second full paragraph on page 3.4-28 of the Draft Supplemental EIR/EIS, the following changes were made: Table 3.4-B-5 in Appendix 3.4-AB, Noise and Vibration Measurements.

In the first paragraph on page 3.4-29 of the Draft Supplemental EIR/EIS, the following changes were made: Table 3.4-AB, Noise and Vibration Measurements.

On page 3.4-30, Figure 3.4-5 Noise Impacts had changed GIS pathways.

On page 3.4-37 of the Draft Supplemental EIR/EIS, the phrase “as discussed below” was removed from the end of the second paragraph.

On page 3.4-35, the following text was added to Table 3.4-26 Mitigation Measures Applicable to the F-B LGA, in the third row, second column:

; diagrams and placement information can be found in Volume III Section H: Record Set PEPD Design Submission Sound Barrier Plans of the Final Supplemental EIR.

On page 3.4-51, Figure 3.4-7 Noise Barrier Locations Inset Area 1 had changed GIS pathways.
On page 3.4-52, Figure 3.4-8 Noise Barrier Locations Inset Area 2 had changed GIS pathways.
On page 3.4-53, Figure 3.4-9 Noise Barrier Locations Inset Area 3 had changed GIS pathways.
On page 3.4-54, Figure 3.4-10 Noise Barrier Locations Inset Area 4 had changed GIS pathways.

16.3.7 Section 3.5

On page 3.5-5 of the Draft Supplemental EIR/EIS, the following changes were made to the text in the eleventh row, third column of Table 3.5 1 Basic EMF-EMI Comparison of the May 2014 Project with F-B LGA: Adventist Health Bakersfield Medical Center Campus (formerly San Joaquin Community Hospital).

In the first paragraph on page 3.5-6 of the Draft Supplemental EIR/EIS, the following changes were made: San Joaquin Community HospitalAdventist Health Bakersfield Medical Center Campus.
In the first paragraph on page 3.5-6 of the Draft Supplemental EIR/EIS, the following changes were made: Adventist Health Bakersfield Medical Center Campus San Joaquin Community Hospital.

In the first paragraph on page 3.5-6 of the Draft Supplemental EIR/EIS, the following changes were made: 4,000,500.

In the third paragraph of Section 3.5.3.3 Receivers Susceptible to EMF/EMI/RF Interference Effects on page 3.5-6 of the Draft Supplemental EIR/EIS, the following changes were made: On page 3.5-6 of the Draft Supplemental EIR/EIS, the following changes were made: Adventist Health Bakersfield Medical Center Campus San Joaquin Community Hospital.

In the third paragraph of Section 3.5.3.3 Receivers Susceptible to EMF/EMI/RF Interference Effects on page 3.5-6 of the Draft Supplemental EIR/EIS, the following changes were made: The northeast corner of the San Joaquin Hospital is approximately 1,500 feet away from the F-B LGA footprint as shown in Figure 3.5-1. The closest parcel owned by the Adventist Bakersfield Medical Center Campus to the F-B LGA right-of-way centerline is approximately 560 feet (this parcel is currently occupied by a surface parking lot and as such does not have any equipment that could be sensitive to EMI/EMFs). The closest Adventist Bakersfield Medical Center facility that may have equipment sensitive to EMI/EMFs is the Quest Imaging building located at 2700 Chester Avenue, which is located approximately 820 feet from the F-B LGA right-of-way centerline (as shown in Figure 3.5-1).

In the last paragraph of Section 3.5.3.3 Receivers Susceptible to EMF/EMI/RF Interference Effects on page 3.5-6 of the Draft Supplemental EIR/EIS, the following changes were made: San Joaquin Community Hospital Adventist Bakersfield Medical Center Campus.

In the last paragraph of Section 3.5.3.3 Receivers Susceptible to EMF/EMI/RF Interference Effects on page 3.5-6 of the Draft Supplemental EIR/EIS, the following changes were made: 4,000,500.

On page 3.5-7, Figure 3.5-1 Proximity of the San Joaquin Community Hospital Bakersfield Medical Center Campus to the F-B LGA had changed GIS pathways.

On page 3.5-7 of the Draft Supplemental EIR/EIS, the following changes were made to the title of Figure 3.5-1: Proximity of the San Joaquin Community Hospital Adventist Health Bakersfield Medical Center Campus to the F-B LGA.

In Section 3.5.6.2 Mitigation Measures Specific to F-B LGA on page 3.5-13 of the Draft Supplemental EIR/EIS, the following changes were made: 1,000,500.

16.3.8 Section 3.6

On page 3.6-6 of the Draft Supplemental EIR/EIS, a sub-row was added to the Water Supply row of Table 3.6-1 Study Area Utility and Energy Providers. Under the Provider column, U.S. Bureau of Reclamation was added, and under the Jurisdiction column, Kern County (Shafter) was added.

16.3.9 Section 3.7

On page 3.7-3 of the Draft Supplemental EIR/EIS, text in Table 3.7-1 Federal Laws and Regulations was changed to add the following text to the Compliance Action column of the Endangered Species Act of 1973 (federal ESA) (16 U.S.C. 1531 et seq.) row:

The F-B LGA was not included in either the April 1, 2014 or July 28, 2017 Biological Opinions, so, in May 2018, the Authority, on behalf of the FRA, requested reinitiation of formal consultation with the USFWS and was issued a Biological Opinion Amendment for the Fresno to Bakersfield Section in July 2018 (USFWS 2018). The Biological Opinion Amendment incorporates the F-B LGA into the overall Fresno to Bakersfield Section Biological Opinion (08ESMF00-2012-F-0247). However, the Authority and FRA have determined that the F-B LGA is consistent with findings in both Biological Opinions. The Consistent with the 2018 Biological Opinion Amendment, the
Authority will require the Design/Build contractor to implement the conservation measures identified in both the 2014 and 2017 Biological Opinions.

On page 3.7-17 of the Draft Supplemental EIR/EIS, the following changes were made to the sixth paragraph in Section 3.7.3.1: Forty-seven-eight special-status wildlife species were determined to have a low, moderate, or high potential of occurring within the Habitat Study Area for the May 2014 Project.

On page 3.7-17 of the Draft Supplemental EIR/EIS, the following changes were made to the sixth paragraph in Section 3.7.3.1: Special-status wildlife species that may be affected by the May 2014 Project include: Kern brook lamprey; western spadefoot; coast horned lizard; blunt-nosed leopard lizard; burrowing owl, Swainson’s hawk, and other raptors; Buena Vista Lake ornate shrew; San Joaquin kit fox; Tipton kangaroo rat; and special-status bats.

On page 3.7-19, Figure 3.7-2 Soils and Watersheds had changed GIS pathways.

On page 3.7-23, Figure 3.7-3 Wildlife Habitat Type had changed GIS pathways.

On page 3.7-30 of the Draft Supplemental EIR/EIS, the following changes were made to Table 3.7-30 Special-Status Wildlife Species with Potential to Occur in the Habitat Study Area:

| Wildlife Species | Potential to occur: No blunt-nosed leopard lizard were observed during 2015 field surveys; however, the Habitat Study Area lies within the species' known range, and several CNDDB records have been reported within a 10-mile radius. Suitable habitat is limited to the annual grassland along the Kern River corridor. There is no potential for this species to occur outside of the Kern River corridor, as potentially suitable land cover is limited in area, discontinuous, and consists primarily of maintained right-of-ways and vacant lots in urban and agricultural areas. |

| Blunt-nosed leopard lizard | Gambelia sila | FE | SE/FP |

On page 3.7-37, Figure 3.7-4 CNDDB Special-Status Plant Communities had changed GIS pathways.

On page 3.7-38, Figure 3.7-5 CNDDB Special-Status Plant Species had changed GIS pathways.

On page 3.7-39, Figure 3.7-6 CNDDB Special-Status Wildlife Species: Amphibians, Fish, Invertebrates, and Reptiles had changed GIS pathways.

On page 3.7-40, Figure 3.7-7 CNDDB Special-Status Wildlife Species: Birds had changed GIS pathways.

On page 3.7-41, Figure 3.7-8 CNDDB Special-Status Wildlife Species: Mammals had changed GIS pathways.

On page 3.7-42, Figure 3.7-9 Special-Status Plant Species and Special-Status Plant Communities Survey Results had changed GIS pathways.

In the first paragraph on page 3.7-53 of the Draft Supplemental EIR/EIS, the following changes were made: typically always.

On page 3.7-55, Figure 3.7-10 Jurisdictional Waters Delineation Results had changed GIS pathways.

On page 3.7-61 of the Draft Supplemental EIR/EIS, the following changes were made to the second paragraph of the subsection Recovery Plans for Federally Listed Species under the Subsection Conservation Areas in Section 3.7.3.2: This recovery plan covers 41 federally listed species, candidate species, and species of concern. The following 41-12 species that are covered by the recovery plan were evaluated for their potential to occur within the F-B LGA Habitat Study Area: California jewelweed, Kern mallow, San Joaquin woolly-threads, Bakersfield cactus, lesser saltbush, Bakersfield smallscale, Munz’s tidy-tips, Tipton kangaroo rat, blunt-nosed leopard lizard, San Joaquin kit fox, Tulare grasshopper mouse, and Le Conte's thrasher.
On page 3.7-61 of the Draft Supplemental EIR/EIS, the following changes were made to the second paragraph of the subsection Metropolitan Bakersfield Habitat Conservation Plan under the Subsection Conservation Areas in Section 3.7.3.2: The MBHCP covers 23 state and federally listed species, candidate species, and species of concern. The following 11 species that are covered by the MBHCP were evaluated for their potential to occur within the F-B LGA Habitat Study Area: Bakersfield cactus, Bakersfield saltbush, Kern mallow, Hoover’s woolly-star, California jewelflower, slough thistle, San Joaquin woolly-threads, blunt-nosed leopard lizard, San Joaquin kit fox, Tipton kangaroo rat, and Tulare grasshopper mouse.

On page 3.7-61 of the Draft Supplemental EIR/EIS, the following changes were made to the second paragraph of the subsection Pacific Gas and Electric Company San Joaquin Valley Operations and Maintenance Habitat Conservation Plan under the Subsection Conservation Areas in Section 3.7.3.2: The Pacific Gas and Electric Company HCP covers 65 special-status plant and animal species. The following 18 species that are covered by this HCP were evaluated for their potential to occur within the F-B LGA Habitat Study Area: Bakersfield smallscale, California jewelflower, Kern mallow, San Joaquin woolly-threads, Bakersfield cactus, lesser saltbush, slough thistle, king’s gold, Swainson’s hawk, white-tailed kite, golden eagle, bald eagle, Tipton kangaroo rat, Nelson’s antelope squirrel, blunt-nosed leopard lizard, San Joaquin kit fox, western burrowing owl, and tricolored blackbird.

On page 3.7-62 of the Draft Supplemental EIR/EIS, the following changes were made to the second paragraph of the subsection First Public Draft – Kern County Valley Floor Habitat Conservation Plan under the Subsection Conservation Areas in Section 3.7.3.2: The VFHCP covers 25 special-status plant and animal species. The following species that are covered by the VFHCP were evaluated for their potential to occur within the F-B LGA: heartscale, Bakersfield smallscale, California jewelflower, slough thistle, Kern mallow, Hoover’s woolly-star, San Joaquin woolly-threads, Bakersfield cactus, San Joaquin whipsnake, Le Conte’s thrasher, Nelson’s antelope squirrel, blunt-nosed leopard lizard, Tipton kangaroo rat, San Joaquin kit fox, and American badger.

On page 3.7-63, Figure 3.7-11 Protected Trees Survey Results had changed GIS pathways.

On page 3.7-71, Figure 3.7-12 Kern River Corridor had changed GIS pathways.

On page 3.7-73 of the Draft Supplemental EIR/EIS, the following change was made to the first paragraph of subsection Special-Status Wildlife Species in Section 3.7.3.2: Twenty-eight special-status wildlife species are known to occur within the Habitat Study Area and could be adversely affected by the May 2014 Project.

On page 3.7-78 of the Draft Supplemental EIR/EIS, the following row was added to Table 3.7-7 Direct Impacts on Special-Status Wildlife Species:

<table>
<thead>
<tr>
<th>Blunt-nosed leopard lizard</th>
<th>AGS (Bakersfield/Kern River)</th>
<th>Permanent</th>
<th>3.62</th>
</tr>
</thead>
<tbody>
<tr>
<td>(Gambelia sila)</td>
<td></td>
<td>Temporary</td>
<td>5.32</td>
</tr>
</tbody>
</table>

On page 3.7-80 of the Draft Supplemental EIR/EIS, the following changes were made to the subsection Reptiles of Section 3.7.3.2: The F-B LGA contains suitable habitat (e.g., unsurveyed annual grassland) for special-status reptiles, including coast horned lizard, San Joaquin whipsnake, silvery legless lizard, blunt-nosed leopard lizard, and western pond turtle (Table 3.7-7).

In the first paragraph on page 3.7-86 of the Draft Supplemental EIR/EIS, the word “further” was added to the following sentence: Wherever suitable lands are modified or degraded during construction, special-status plant species are unlikely to reoccur and operational activities that require maintenance of the railway are unlikely to result in direct effects to special-status plant species.
After the fourth paragraph on page 3.7-86 of the Draft Supplemental EIR/EIS, the following text was added:

As described above, the F-B LGA would result in direct and indirect effects on special-status plant species. Therefore, prior to the implementation of mitigation measures, the project would result in a significant impact under CEQA.

In the last paragraph on page 3.7-86 of the Draft Supplemental EIR/EIS, the words “herbicide application” was added to the following sentence: If operations and maintenance activities occur where any special-status wildlife species re-colonizes, potential direct effects may occur where maintenance-associated ground disturbance, herbicide application, clearing, or grubbing are required.

In the first paragraph on page 3.7-87 of the Draft Supplemental EIR/EIS, the word “further” was added to the following sentence: Because potentially suitable habitat will be converted and made unsuitable during construction, operational activities that require maintenance of the railway are not expected to result in further indirect effects to special-status wildlife species.

After the second paragraph on page 3.7-87 of the Draft Supplemental EIR/EIS, the following text was added:

As described above, the F-B LGA would result in direct and indirect effects on special-status wildlife species. Therefore, prior to the implementation of mitigation measures, the project would result in a significant impact under CEQA.

In the third paragraph on page 3.7-87 of the Draft Supplemental EIR/EIS, the word “further” was added to the following sentence: Wherever suitable lands are modified or degraded during construction, special-status plant communities are unlikely to reoccur and operational activities that require maintenance of the railway are unlikely to result in further direct effects to special-status plant communities. In the fourth paragraph on page 3.7-87 of the Draft Supplemental EIR/EIS, the following changes were made:

Permanent indirect impacts on special-status plant communities outside of the project footprint would include fragmentation and introduction of nonnative, invasive plant species. These changes would result in decreased viability and gradual loss of special-status plant communities. However, because special-status plant communities in the operations area will be converted and made unsuitable during construction, operational activities that require maintenance of the railway are not expected to result in further indirect effects to special-status plant communities outside the project footprint.

As described above, the F-B LGA would result in project effects on special-status plant communities. Therefore, prior to the implementation of mitigation measures, the project would result in a significant impact under CEQA.

After the sixth paragraph on page 3.7-87 of the Draft Supplemental EIR/EIS, the following text was added:

As described above, the F-B LGA would result in direct and indirect effects on jurisdictional waters. Therefore, prior to the implementation of mitigation measures, the project would result in a significant impact under CEQA.

The following text was added to the last paragraph on page 3.7-87 of the Draft Supplemental EIR/EIS:

Project direct impacts on the Recovery Plan for Upland Species of the San Joaquin Valley, California plan area include the creation of permanent partial barriers to special-status species, the loss or degradation of special-status plant and wildlife species, and the loss or degradation of the lands that could support or provide habitat for these species.

The following text was added after the last paragraph on page 3.7-87 of the Draft Supplemental EIR/EIS:
As described above, the F-B LGA would result in project effects on conservation areas. Therefore, prior to the implementation of mitigation measures, the project would result in a significant impact under CEQA.

The following text was added after the first paragraph on page 3.7-88 of the Draft Supplemental EIR/EIS:

Therefore, prior to the implementation of mitigation measures, the project would result in a significant impact under CEQA.

The following text was added after the third paragraph on page 3.7-88 of the Draft Supplemental EIR/EIS:

As described above, the F-B LGA would result in direct and indirect effects on wildlife movement corridors. Therefore, prior to the implementation of mitigation measures, the project would result in a significant impact under CEQA.

On page 3.7-90 of the Draft Supplemental EIR/EIS, the following rows were added to Table 3.7 12 Mitigation Measures Applicable to the F-B LGA:

| BIO-MM#26 | Conduct Protocol-Level Surveys for Blunt-Nosed Leopard Lizard |
| BIO-MM#27 | Phased Preconstruction Surveys for Blunt-Nosed Leopard Lizard |
| BIO-MM#28 | Blunt-Nosed Leopard Lizard Avoidance |
| BIO-MM#57 | Compensate for Impacts on Blunt-Nosed Leopard Lizard, Tipton Kangaroo Rat, and Nelson’s Antelope Squirrel |

On page 3.7-91 of the Draft Supplemental EIR/EIS, the following rows were deleted from Table 3.7 13 Mitigation Measures Partially or Not Applicable to the F-B LGA:

| BIO-MM#57 | Compensate for Impacts on Blunt-Nosed Leopard Lizard, Tipton Kangaroo Rat, and Nelson’s Antelope Squirrel |
| BIO-MM#27 | Phased Preconstruction Surveys for Blunt-Nosed Leopard Lizard |
| BIO-MM#28 | Blunt-Nosed Leopard Lizard Avoidance |

In the third full paragraph on page 3.7-93 of the Draft Supplemental EIR/EIS, the following text was added:

Also subsequent to publication of the Draft Supplemental EIR/EIS, in May 2018, the Authority, on behalf of the FRA, requested reinitiation of formal consultation with the USFWS and was issued a Biological Opinion Amendment for the Fresno to Bakersfield Section in July 2018 (USFWS 2018). The Biological Opinion Amendment incorporates the F-B LGA into the overall Fresno to Bakersfield Section Biological Opinion (08ESMF00-2012-F-0247). The 2018 Biological Opinion Amendment does not reflect any changes to the conservation measures applicable to the F-B LGA; therefore, as discussed in Table 3.7-1 of the Draft Supplemental EIR/EIS, the conservation
measures identified in the 2014 and 2017 Biological Opinions would still apply to the F-B LGA. The USFWS’s Biological Opinion Amendment determined that construction of the F-B LGA was not likely to jeopardize listed species or result in the destruction or adverse modification of critical habitat.

On page 3.7-95 of the Draft Supplemental EIR/EIS, the text “Bio #1 and #5” was added to the following subsection: **BIO #1 and #5: Special-Status Plant Species.**

On page 3.7-95 of the Draft Supplemental EIR/EIS, the text “Bio #2 and #6” was added to the following subsection: **BIO #2 and #6: Special-Status Wildlife Species**

On page 3.7-95 of the Draft Supplemental EIR/EIS, the following change was made under subsection **BIO #2 and #6: Special-Status Wildlife Species:**

BIO-MM#1 through 15, 22 through 23, 29-26 through 38, 40 through 46, 51 through 52, 57 through 62, and 65 through 67

On page 3.7-96 of the Draft Supplemental EIR/EIS, the text “Bio #3 and #7” was added to the following subsection: **BIO #3 and #7: Habitats of Concern**

On page 3.7-96 of the Draft Supplemental EIR/EIS, the text “Bio #4 and #8” was added to the following subsection: **BIO #4 and #8: Wildlife Movement**

**16.3.10 Section 3.8**

On page 3.8-7, **Figure 3.8-1 Regional Hydrologic Setting** had changed GIS pathways.

On page 3.8-13, **Figure 3.8-2 Surface Waters and Floodplain** had changed GIS pathways.

On page 3.8-17, **Figure 3.8-3 Water Districts – Federal and State** had changed GIS pathways.

On page 3.8-18, **Figure 3.8-4 Water Districts – Private** had changed GIS pathways.

On page 3.8-23, **Figure 3.8-5 Groundwater Basins** had changed GIS pathways.

Under Construction Period Impacts in Section 3.8.4.2 Fresno to Bakersfield Locally Generated Alternative on page 3.8-29 of the Draft Supplemental EIR/EIS, the following changes were made: Fresno to Bakersfield Project Section.

In the first paragraph on page 3.8-31 of the Draft Supplemental EIR/EIS, the following changes were made: In addition, if there is an accidental spill or release during construction, hazardous waste and materials could contaminate stormwater runoff, impacting water quality. As discussed in Section 3.10, Hazardous Materials and Wastes, the F-B LGA would be required to comply with the spill prevention, containment, and countermeasures control (SPCC) plan, which identifies BMPs for spill and release prevention and provides procedures and responsibility to clean up and dispose of spills or releases that could impact water quality during construction. Therefore, through adherence to the requirements of the Construction General Permit, as required by Avoidance and Minimization Measures HYD-AM #3 and HMW IAMMM#7, and implementation of cofferdams for in-water work, effects from construction on surface water quality would be less than significant under CEQA because erosion would be minimized and pollutants of concern in stormwater runoff, including hazardous materials and waste, would be reduced. This avoidance and minimization measures would be incorporated into the design of the project.

In the first paragraph on page 3.8-32 of the Draft Supplemental EIR/EIS, the following text was added: In addition, if there is an accidental spill or release during construction, hazardous waste and materials could contaminate stormwater runoff and infiltrate into the groundwater basin. As discussed in Section 3.10, Hazardous Materials and Wastes and in compliance with the SPCC plan, BMPs for spill and release prevention and procedures for cleaning up and disposing of spills would be implemented at construction sites to reduce the potential for construction-related hazardous waste and materials to infiltrate into the groundwater basin, as required by Avoidance and Minimization Measure HMW IAMMM#7.
In the first paragraph of Section 3.8.5.1 Avoidance and Minimization Measures on page 3.8-40 of the Draft Supplemental EIR/EIS, the following text was added: All of the avoidance and minimization measures (referred to as project design features in Section 3.8.6 of the Fresno to Bakersfield Section Final EIR/EIS) are applicable to the F-B LGA, in addition to Avoidance and Minimization Measure HWM IAMM#7, Spill Prevention, from Section 3.10, Hazardous Materials and Waste of the Draft Supplemental EIR/EIS.

16.3.11 Section 3.9

On Page 3.9-4 of the Draft Supplemental EIR/EIS, the following text was added to the end of Section 3.9.2.2 California Environmental Quality Act Significance Criteria:

For the purposes of this report, the F-B LGA would result in a significant impact on paleontological resources if it would:

- Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature

On Page 3.9-37 of the Draft Supplemental EIR/EIS, under Paleontological Resources in Section 3.9.6.2 Mitigation Measures Specific to the F-B LGA, the following changes were made:

With the implementation of Mitigation Measures CUL-MM #16 through CUL-MM #18, and discussed in the preceding impact analysis, adverse effects associated with disturbance of paleontological resources during project construction would be mitigated by ensuring appropriate monitoring and cessation of ground-disturbing activities, as needed, to avoid destruction of paleontological resources. These mitigation measures identify responsible parties for each project phase (pre-construction, and construction) to ensure that the requirements are appropriately implemented. There are no further applicable mitigation measures for impacts to paleontological resources resulting specifically from the F-B LGA.

16.3.12 Section 3.10

There were no changes to Section 3.10 aside from the global changes described in Section 16.2 of this Chapter.

16.3.13 Section 3.11

On page 3.11-7, Figure 3.11-3 Shafter Area: Safety and Security Existing Conditions had changed GIS pathways.

In the first paragraph under Emergency Medical Services on page 3.11-9 of the Draft Supplemental EIR/EIS, the following bullet point was removed:

- Mercy Southwest Hospital

In the first paragraph under Emergency Medical Services on page 3.11-9 of the Draft Supplemental EIR/EIS, the following changes were made:

- Adventist Health Bakersfield Medical Center Campus
- San Joaquin Community Hospital

In the fourth paragraph on page 3.11-11 of the Draft Supplemental EIR/EIS, the following changes were made: does not contains.

In the first row of Table 3.11 2 Airports, Airstrips, and Heliports within 2 Miles of the F-B LGA Centerline on page 3.11-11 of the Draft Supplemental EIR/EIS, the following changes were made: Adventist Health Bakersfield Medical Center Campus

San Joaquin Community Hospital

On page 3.11-15, Figure 3.11-4 Location of Tall Structures and High Risk Facilities along the May 2014 Project and F-B Alignments had changed GIS pathways.

On page 3.11-27 in the first paragraph under Impact S&S #9 – Increased Response Times for Fire, Rescue, and Emergency Services Associated with Access to Elevated Track of the Draft Supplemental EIR/EIS, the following changes were made: 65 73.
On page 3.11-28 at the end of the last paragraph under Impact S&S #10 – Need for Expansion of Existing Fire, Rescue, and Emergency Services Facilities, the following changes were made:

However, similar to the May 2014 Project, the impact on emergency response due to the increase in population under the F-B LGA would be significant under CEQA. However, with implementation of Mitigation Measure S&S MM #1, impacts would be less than significant under CEQA.

On page 3.11-28 in the first paragraph under Impact S&S #11 – Accident Risks to Airports, Private Airstrips, and Heliports, the following changes were made: Adventist Health Bakersfield Medical Center CampusSan Joaquin Community Hospital.

16.3.14 Section 3.12

On page 3.12-10, Figure 3.12-2 Fresno to Bakersfield Locally Generated Alternative and Alternative Alignments was revised to remove all alignments aside from the F-B LGA and May 2014 Project alignments.

In the first paragraph under Kern County on page 3.12-21 of the Draft Supplemental EIR/EIS, the parenthetical insertion “[in the number of housing units]” was added to the following sentence: Between 2000 and 2013, the number of housing units in Kern County increased by 23.5 percent, slightly more than the region’s 20.1 percent increase [in the number of housing units].

On page 3.12-44 of the Draft Supplemental EIR/EIS, at the end of the third paragraph under Impact SO #2 – Construction Effects on Children’s Health and Safety, the following sentence was removed:

Therefore, effects to children’s health resulting from construction-related air emissions would be less than significant under CEQA.

On page 3.12-44 of the Draft Supplemental EIR/EIS, at the end of the fourth paragraph under Impact SO #2 – Construction Effects on Children’s Health and Safety, the following sentence was removed:

Therefore, effects to children’s health, as they relate to school access, would be less than significant under CEQA.

On page 3.12-44 of the Draft Supplemental EIR/EIS, at the end of the fifth paragraph under Impact SO #2 – Construction Effects on Children’s Health and Safety, the following sentence was removed:

Therefore, effects to children’s health, as they relate to the transport, use, and disposal of hazardous materials during construction, would be less than significant under CEQA.

In the last sentence of the first paragraph under Impact SO #3 – Construction-Related Property Tax Revenue Reductions on page 3.12-44 of the Draft Supplemental EIR/EIS, the following change was made: Impact SO #1217 – Operation-Related Property and Sales Tax Revenue Effects.

In the last sentence of the second paragraph under Impact SO #3 – Construction-Related Property Tax Revenue Reductions on page 3.12-44 of the Draft Supplemental EIR/EIS, the following change was made: Impact SO #14 15 – Changes in School District Funding and School Access.

In the last sentence of the final paragraph under Impact SO #6 – Disruption to Community Cohesion or Division of Existing Communities from Project Operation on page 3.12-50 of the Draft Supplemental EIR/EIS, the following changes were made:

The F-B LGA would have potentially significant impacts. Implementation of measures SO-MM#1, SO-MM#3, and SO-MM#5 would mitigate any impacts to Therefore, these impacts would be less than significant under CEQA.
In the last sentence of the final paragraph under Impact SO #7 – Effects to the Regional Agricultural Community on page 3.12-51 of the Draft Supplemental EIR/EIS, the following changes were made:

This impact would be less than significant under CEQA. Regardless, the F-B LGA could have potentially significant impacts. Implementation of measure SO-MM#4 would mitigate any impacts to less than significant under CEQA.

In the second full paragraph on page 3.12-59 of the Draft Supplemental EIR/EIS under Impact SO #12 – Displacement of Community Facilities, the following text was added: The implementation of mitigation measure SO-MM #3 would reduce potential impacts associated with displacement of community facilities to less than significant under CEQA.

In the first paragraph on page 3.12-64 of the Draft Supplemental EIR/EIS, under section 3.12.6.1 Mitigation Measures Identified in the Fresno to Bakersfield Section Final EIR/EIS, the following text was added: impacts SO #6 and.

In the first paragraph on page 3.12-64 of the Draft Supplemental EIR/EIS, under section 3.12.6.2 Mitigation Measures Specific to F-B LGA, the text “disruptions to community cohesion,” was added to the following paragraph:

With the implementation of Mitigation Measures SO-MM#4 and SO-MM#5, described above, adverse effects associated with split agricultural parcels, disruption to rural agricultural communities, disruptions to community cohesion, and physical deterioration of community facilities would be mitigated by providing undercrossings/overcrossings to maintain access for affected farmers and lessen the aesthetics impacts of the introduction of new structures associated with the F-B LGA.

In the second paragraph on page 3.12-64 of the Draft Supplemental EIR/EIS, under section 3.12.6.2 Mitigation Measures Specific to F-B LGA, the text “disruptions to community cohesion,” was added to the following paragraph:

In addition, to ensure appropriate mitigation for displaced residences in agricultural areas, disruptions to community cohesion, and impacts to community facilities, Mitigation Measures SO-MM#1 and SO-MM#3 in Table 3.12-30 would also be implemented. These mitigation measures were previously approved as described in the Fresno to Bakersfield Section Mitigation and Monitoring Enforcement Plan (Authority and FRA 2014: 1-50), but have been revised for applicability to resources affected by the F-B LGA.

In the second paragraph on page 3.12-65 of the Draft Supplemental EIR/EIS, the following changes were made: Mitigation Measure SO-MM #3 addresses disruption to and physical deterioration of community facilities, including the Bakersfield Homeless Center and the Mercado Latino Tianguis, during construction and operation of the F-B LGA (Impacts SO #6, SO #12, and SO #18).

16.3.15 Section 3.13

On page 3.13-5, of the Draft Supplemental EIR/EIS, the following sentence was added to the fourth paragraph of Section 3.13.3.2: The alignment would require the conversion of the Bakersfield Homeless Center.

On page 3.13-9 of the Draft Supplemental EIR/EIS, the following row was added to Table 3.13-1 Planned Development in the F-B LGA Station Site Study Area:

| Golden Empire Transit District Facility | 1830 Golden State Avenue | 0.0 | M-1 |

In the last paragraph on page 3.13-10 of the Draft Supplemental EIR/EIS, the following in-text citation was added: (California Supreme Court Case No. 34-2014-80001866: City of Bakersfield v. California High-Speed Rail Authority 2014).
In the last paragraph on page 3.13-15 of the Draft Supplemental EIR/EIS, the following text was added to the first bullet point: The Bus Rapid Transit project is a Golden Empire Transit project.

On page 3.13-17, Figure 3.13-3 Station Connectivity – Bakersfield F Street Station had changed GIS pathways.

**16.3.16 Section 3.14**

On page 3.14-22 of the Draft Supplemental EIR/EIS, under Impact AG #5 – Effects on Agricultural Land from Parcel Severance, the clause “from placement of the HSR infrastructure” was added to the following sentence:

In addition to conversion of Important Farmland from placement of the HSR infrastructure, the Fresno to Bakersfield Section Final EIR/EIS also considered whether parcel severance would lead to further conversion of Important Farmland (Authority and FRA 2014a: pages 3.14-50 and 3.14-51).

On page 3.14-29 of the Draft Supplemental EIR/EIS, the following text from the end of the first paragraph under Impact AG #5 – Effects on Agricultural Land from Parcel Severance on page 3.14-30, and from the end of the second paragraph under Impact AG #5 – Effects on Agricultural Land from Parcel Severance on page 3.14-31 was relocated to follow the second paragraph under Impact AG #4 – Permanent Conversion of Agricultural Land to Nonagricultural Use:

In addition to direct impacts from the project footprint, as described above, indirect impacts also occur to Important Farmland within a 25-foot-wide area adjacent to permanently fenced HSR infrastructure. The F-B LGA would result in indirect impacts to 69 acres of Important Farmland inside this 25-foot area adjacent to permanently fenced HSR infrastructure. Mitigation Measure AG-MM#2 would apply for indirect impacts to Important Farmland within a 25-foot-wide area adjacent to permanently fenced HSR infrastructure, but only to the extent that such acreage is not otherwise subject to mitigation under AG-MM#1. The Authority will fund the purchase of agricultural conservation easements from willing sellers through the California Farmland Conservancy Program at a ratio of not less than 0.5:1 for Important Farmland. With the implementation of Mitigation Measure AG-MM#2, adverse effects associated with the conversion of Important Farmland would be mitigated to the extent feasible.

In the last paragraph on page 3.13-15 of the Draft Supplemental EIR/EIS, the following text was added to the beginning of the third paragraph under Impact AG #5 – Effects on Agricultural Land from Parcel Severance:

Size was not the only factor used to determine if remainder parcels would be at risk for permanent conversion to a nonagricultural use.

On page 3.14-32 of the Draft Supplemental EIR/EIS, the following changes were made to the last paragraph under Impact AG #5 – Effects on Agricultural Land from Parcel Severance:

As stated in the impact discussion, above, the provision of regular crossings in the F-B LGA project design would not result in increased travel to reach a severed parcel across the HSR right-of-way. Existing travel widths would be maintained and vertical distance of grade-separated crossings would adequately accommodate equipment movement and would not result in the permanent conversion of more Important Farmland for accommodating movement of agricultural equipment (Authority 2012c). Considering that agricultural land in the San Joaquin Valley is among the most valuable in the United States, it is anticipated that while parcel ownership may change due to severance, the larger remnant parcels would remain in agricultural use. Therefore, this impact would have a less than significant impact under CEQA.

On page 3.14-32 of the Draft Supplemental EIR/EIS, the following text was added to the last paragraph under Impact AG #6 – Effects on Land under Williamson Act, Farmland Security Zone Contracts, or Local Zoning:

While AG#6 would remove the temporary protection provided by Williamson Act contracts from 114 acres of land, and potentially more if the three parcels identified in Table 3.14-13 are
potentially no longer eligible for Williamson Act contracts because they do not meet the 20-acre minimum, implementation of Mitigation Measure AG-MM#1 would permanently protect substantially more Important Farmland from conversion to a non-agricultural use. Based on the magnitude of permanently preserved acres of Important Farmland under AG-MM#1 relative to the number of acres that potentially could lose Williamson Act contract tax benefits, this impact is substantially lessened and reduced to a less-than-significant level by implementation of AG-MM#1.

On page 3.14-40 of the Draft Supplemental EIR/EIS, the following changes were made to the first paragraph under 3.14.6.2 Mitigation Measures Specific to F-B LGA:

Mitigation measure AG-MM#2 is new and would apply to the F-B LGA for indirect impacts resulting from permanent conversion of agricultural lands adjacent to permanently fenced HSR infrastructure.

On page 3.14-40 of the Draft Supplemental EIR/EIS, the following changes were made to the second paragraph under 3.14.6.2 Mitigation Measures Specific to F-B LGA:

With implementation of Mitigation Measures AG-MM#1 and AG-MM#2 (Table 3.14-14), adverse effects associated with the permanent conversion of Important Farmland would be mitigated to the extent feasible. These mitigation measures identify the responsible party (Authority) to ensure that the measures are appropriately implemented. The mitigation measures would minimize or avoid significant adverse agricultural impacts to the extent feasible. However, adverse impacts to agricultural resources related to the permanent conversion of Important Farmland, in the context of the regional agricultural setting where the permanent loss of any agricultural land is significant, would remain significant under CEQA after implementation of mitigation.

16.3.17 Section 3.15

On page 3.15-9 of the Draft Supplemental EIR/EIS, the following changes were made to Table 3.15-1 Parks, Recreation, and Open Space Resources within 1,000 feet of the F-B LGA Centerline:

<table>

### 16.3.18 Section 3.16

In the fourth paragraph on page 3.16-17 of the Draft Supplemental EIR/EIS, the clause "and planned suburban residential development in the Gossamer Grove Specific Plan area located" was added to the following sentence: However, scattered rural residents and planned suburban residential development in the Gossamer Grove Specific Plan area located within the 0.5-mile foreground distance have high visual sensitivity.

In the third paragraph on page 3.16-56 of the Draft Supplemental EIR/EIS, the following text was added: Planned suburban residential development in the Gossamer Grove Specific Plan area also would introduce residents with high viewer sensitivity adjacent to the HSR alignment near Verdugo Lane.

### 16.3.19 Section 3.17

In the first paragraph on page 3.17-3 of the Draft Supplemental EIR/EIS, the following changes were made: The PA is included in the the Fresno to Bakersfield Section Final EIR/EIS as Appendix 3.17-A.

In the second paragraph on page 3.17-3 of the Draft Supplemental EIR/EIS, the following changes were made: the MOA would be amended to include those properties, and the treatment plans would also be amended to incorporate the agreed-upon changes.

In the third paragraph on page 3.17-3 of the Draft Supplemental EIR/EIS, the following changes were made: May 24 August 31, 2017. The SHPO concurred with the Supplemental FOE on September 14, 2017 is currently under review by the SHPO. The amended MOA and the amended treatment plans will be finalized before the Record of Decision is signed.

On page 3.17-13, Figure 3.17-1 Historic Properties and Historical Resources Identified in the F-B LGA Area of Potential Effect had changed GIS pathways.

In the second full paragraph on page 3.17-36 of the Draft Supplemental EIR/EIS, the following changes were made: and the MOA and treatment plans will be amended.

In the second full paragraph on page 3.17-36 of the Draft Supplemental EIR/EIS, the following changes were made: and the MOA will be amended to incorporate treatment to those properties.
In the second full paragraph on page 3.17-36 of the Draft Supplemental EIR/EIS, the following text was added: The Section 106 PA stipulates that the treatment plans will be amended should any additional archaeological or built resources be identified that may be adversely affected by the F-B LGA Project section.

In the third full paragraph on page 3.17-36 of the Draft Supplemental EIR/EIS, the following changes were made: MOAtreatment plans.

In the first paragraph in Section 3.17.5 Avoidance and Minimization Measures on page 3.17-44 of the Draft Supplemental EIR/EIS, the following changes were made: The Fresno to Bakersfield MOA and BETP would be amended, if applicable, to include the treatment of the historic properties identified in the F-B LGA APE.

In the second paragraph on page 3.17-45 of the Draft Supplemental EIR/EIS, the following changes were made: the F-B MOA will be amended, as will the associated treatment plans will be amended.

In the second paragraph in Section 3.17.6.1 Mitigation Measures Identified in the Fresno to Bakersfield Section Final EIR/EIS on page 3.17-46 of the Draft Supplemental EIR/EIS, the following changes were made: If the F-B LGA is selected as the Preferred Alternative, the FRA and Authority would consult with the MOA signatories and concurring parties and amend the MOA, ATP and BETP before the start of construction activities that could adversely affect historic properties.

16.3.20 Section 3.18

There were no changes to Section 3.18 aside from the global changes described in Section 16.2 of this Chapter.

16.3.21 Section 3.19

There were no changes to Section 3.19 aside from the global changes described in Section 16.2 of this Chapter.

16.3.22 Chapter 5

On page 5-15 of the Draft Supplemental EIR/EIS, the following text was added: More recently, since December 2014, additional meetings targeted at minority and low-income populations have been held.

On page 5-26 of the Draft Supplemental EIR/EIS, the following text was removed: In addition, Bakersfield High School could be impacted, which is a facility used by the community as a whole, including minority and low-income populations.

On page 5-27 of the Draft Supplemental EIR/EIS, the following changes were made: The greatest effects would be experienced at Kern River Parkway, McMurtrey Aquatic Center, and Mill Creek Linear Park and Bakersfield High School recreation facilities in Bakersfield.

On page 5-28 of the Draft Supplemental EIR/EIS, the following changes were made:

**Cumulative Impacts**

Analysis for cumulative impacts is based on the analysis found in Section 3.19.4.2 of the Final EIR/EIS. Within the study area for the May 2014 Project, there is a high percentage of the population that self-reports as minority and low-income. Construction impacts, such as those as described in Section 3.12.5, Section 3.4.5, and Section 3.16.5 of the Fresno to Bakersfield Section Final EIR/EIS, could result in disproportionately high and adverse impacts on these minority and low-income communities where construction of the HSR project coincides with construction of other past, present and reasonably foreseeable projects, especially in the urbanized areas of Shafter and Bakersfield.

The HSR project in combination with the projects in these cities, such as the reconstruction and widening of roads, the double tracking of the BNSF Railway, and construction of the Centennial...
Corridor Project and widening of Rosedale Highway, would exacerbate disproportionate adverse impacts on environmental justice communities.

Much of the populated study area that would be affected by construction period impacts contains environmental justice communities. As a result, the May 2014 Project located near the densely populated urban areas of Shafter and Bakersfield would result in disproportionately high and adverse cumulative effects on these populations.

On page 5-32 of the Draft Supplemental EIR/EIS, the following text was added: Although the May 2014 Project alignment largely follows the BNSF railway,

On page 5-33 of the Draft Supplemental EIR/EIS, the following text was removed: May 2014 Project would displace the Industrial Arts building at Bakersfield High School, which is attended by predominantly minority and low-income students. Further, the May 2014 Project would displace the Bakersfield Homeless Shelter, which serves low-income families, as well as the Mercado, which serves a minority community, and several buildings of the Mercy Hospital medical complex, which has programs dedicated to low-income communities.

On page 5-34 of the Draft Supplemental EIR/EIS, the following changes were made:

**Cumulative Impacts**

Analysis for cumulative impacts is based on the analysis found in Section 3.19.4.2 of the Final EIR/EIS. Cumulative impacts of the May 2014 Project, such as division of communities, displacements of businesses and residences, and increased noise and traffic levels, would occur primarily in urban areas which are disproportionately minority and low-income. For example, in the cities of Fresno and Bakersfield, construction of the HSR stations would result in an increase in employment in the study area and would have beneficial economic impacts on the community. On the other hand, there are cumulatively considerable noise impacts, and a majority of these impacts would be in urban areas with high concentrations of environmental justice communities, including Shafter and Bakersfield. These environmental justice effects are detailed in Section 3.12.5, Socioeconomics, Communities and Environmental Justice, of the Fresno to Bakersfield Section Final EIR/EIS. Under the cumulative scenario, the impacts to community disruption and division described above occur in several communities with environmental justice populations and could result in disproportionately high and adverse impacts on those populations. These include several roadway widening projects such as Lerdo Highway and 7th Standard Road in the communities of Shafter and Crome. In Bakersfield, the project occurring in areas with environmental justice populations is the Centennial Corridor Project.

On page 5-41 of the Draft Supplemental EIR/EIS, the following changes were made:

**Cumulative Impacts**

Cumulative construction impacts such as division of communities, displacements of businesses and residences, and increased noise and traffic levels, would occur primarily in urban areas which include disproportionately high minority and low-income communities. Under the cumulative scenario, the impacts to community disruption and division described in this Section occur in several communities with environmental justice populations and could result in cumulatively significant, disproportionately high and adverse impacts to those populations.

Construction impacts, such as those as described in this the Draft Supplemental EIR/EIS in Section 3.12.4, Section 3.4.3, Section 3.16.3, and those discussed above in this Section, could result in disproportionately high and adverse impacts on these minority and low-income communities where construction of the HSR project coincides with construction of other past, present and reasonably foreseeable projects, especially in the urbanized areas of Shafter and Bakersfield. Some of these projects include, but are not limited to, the Hageman Flyover and Rosedale Highway improvements in Bakersfield, the North and West Beltway constructions in Shafter, and various industrial, commercial, and residential projects in both cities.

The HSR project in combination with the projects in these cities, such as the reconstruction and widening of roads, could exacerbate disproportionate adverse impacts on environmental justice...
communities. However, project design features and mitigation measures would reduce most of the potential project impacts to minority and low-income populations. Additionally, as discussed in Section 5.6.5, this project would result in benefits which would accrue to minority and low-income populations.

No further mitigation measures are required beyond those approved under the Fresno to Bakersfield Section Final EIR/EIS. For a discussion of the mitigation measures applicable to both the F-B LGA and the May 2014 Project see Chapter 3 of this the Draft Supplemental EIR/EIS.

On page 5-45 of the Draft Supplemental EIR/EIS, the following changes were made:

**Cumulative Impacts**

Cumulative operational impacts such as division of communities and displacements of businesses and residences would occur primarily in urban areas which include disproportionately high minority and low-income communities. Under the cumulative scenario, the impacts to community disruption and division described in this Section occur in several communities with environmental justice populations and could result in cumulatively significant, disproportionately high and adverse impacts to those populations.

Operation impacts, such as those as described in this Section, could result in disproportionately high and adverse effects on these minority and low-income communities in combination with other past, present and reasonably foreseeable projects, especially in the urbanized areas of Shafter and Bakersfield. However, project design features and mitigation measures would reduce most of the potential project impacts to minority and low-income populations. Additionally, as discussed in Section 5.6.5, this project would result in transportation, employment, and economic benefits which would accrue to minority and low-income populations.

No further mitigation measures are required beyond those approved under the Fresno to Bakersfield Section Final EIR/EIS. For a discussion of the mitigation measures applicable to both the F-B LGA and the May 2014 Project see Chapter 3 of this the Draft Supplemental EIR/EIS.

On page 5-50 of the Draft Supplemental EIR/EIS, the following changes were made to Table 5.3 Environmental Justice Impact Comparison between the May 2014 Project and the Fresno to Bakersfield Locally Generated Alternative: Lesser impacts would occur under the F-B LGA as it would result in permanent conversion of an estimated 819,844 acres of land currently in other uses to transportation-related uses compared to the 97,67 acres that would be converted by the May 2014 Project. Of these the May 2014 Project would convert approximately 151 acres of land designated for residential uses and 132 acres of land designated for commercial uses; while the F-B LGA would convert only 6 acres of land designated for residential uses and 20 acres of land designated for commercial uses. Additionally, unlike the May 2014 Project, the F-B LGA would primarily follow existing transportation corridors and would result largely in the conversion of industrial/commercial uses to transportation. The conversion of land along the alignment to transportation uses would, therefore, not result in incompatible land use effects.

16.3.23 Chapter 6

On page 6-1 of the Draft Supplemental EIR/EIS, the source listed for Table 6-1 Capital Cost of the High-Speed Rail Alternatives was changed in the following way: Source: Authority 20176.

On page 6-6 of the Draft Supplemental EIR/EIS, the following parenthetical text was added to the title of Table 6-5: Table 6.5 Annual 2035 Operating and Maintenance Costs Apportioned to the May 2014 Project and F-B LGA (2010 $millions).

16.3.24 Chapter 7

There were no changes to Chapter 7 aside from the global changes described in Section 16.2 of this Chapter.

16.3.25 Chapter 8

On page 8-3, Figure 8-1 F-B LGA and May 2014 Project had changed GIS pathways.
On page 8-6 of the Draft Supplemental EIR/EIS, the following changes were made: A summary of these activities since 2014 through the publication of this the Draft Supplemental EIR/EIS is provided below in Sections 8.1.1 through 8.1.4 of the Draft Supplemental EIR/EIS.

During the comment period, the Authority and FRA received 286 submissions and 1,068 comments on the Fresno to Bakersfield Section Draft Supplemental EIR/EIS. The comments covered a wide range of issues and represented viewpoints from government agencies, organizations, businesses, residents, and property owners.

Most comments came from individuals in the general public who live, work, or have property interests in the project study area, or from businesses/organizations that operate or reside in the project study area.

A majority of the comments received from the general public supported a station at Truxtun Avenue (associated with the May 2014 Project). However, the City of Bakersfield via comment from its City Manager, expressed support for the F-B LGA and the F Street Station.

On pages 8-7 and 8-8 of the Draft Supplemental EIR/EIS, the following bullet points were added:

- May 17, 2017
- June 21, 2017
- July 19, 2017
- August 16, 2017 (USEPA, USACE, USBR, and STB in attendance)
- November 15, 2017
- January 17, 2018 (USEPA, USACE, USFWS, STB, and State Historic Preservation Office [SHPO] in attendance)
- March 21, 2018 (USEPA, USACE, USBR, CDFW, STB, SWRCB, and SHPO in attendance)

16.3.26 Chapter 9

On page 9-1 of the Draft Supplemental EIR/EIS, the text “Supplemental EIR/EIS and the publication of this the Draft Supplemental EIR/EIS” was added to the following sentence: This Chapter focuses on the extensive public and agency outreach associated with the Fresno to Bakersfield Locally Generated Alternative (F-B LGA) Draft Supplemental EIR/EIS and outreach that has occurred between the conclusion of the comment process for the Draft Supplemental EIR/EIS and the publication of this the Draft Supplemental EIR/EIS.

On page 9-2 of the Draft Supplemental EIR/EIS, the following changes were made: Also per the Settlement Agreement, the Authority has agreed to hold a public workshop at which oral public comments on the Draft Supplemental EIR/EIS would be taken; this meeting would take place occurred at the Marriott Hotel in the City of Bakersfield on December 19, 2017 and would included a court reporter to transcribe any public comments provided.

Starting on page 9-3 of the Draft Supplemental EIR/EIS, the second column of Table 9-1 Public and Agency Meetings was changed in the following ways: Meetings Held from March 2015 to October 2016December 2017.

On page 9-9 of the Draft Supplemental EIR/EIS, the following row was added to Table 9-1 Public and Agency Meetings:

| 12/19/17 | Public Hearing, Bakersfield | Draft Supplemental EIR/EIS |

On page 9-11 of the Draft Supplemental EIR/EIS, the following text was added to Section 9.3.3:

9.3.3.2 USFWS Formal Consultation

Subsequent to publication of the Draft Supplemental EIR/EIS, in May 2018, the Authority, on behalf of the FRA, requested reinitiation of formal consultation with the U.S. Fish and Wildlife
Service (USFWS) and was issued a Biological Opinion Amendment for the Fresno to Bakersfield Section in July 2018 (USFWS 2018). The Biological Opinion Amendment incorporated the F-B LGA into the overall Fresno to Bakersfield Section Biological Opinion (08ESMF00-2012-F-0247). As discussed in Table 3.7-1 of this Final Supplemental EIR/EIS, the conservation measures identified in the 2014 and 2017 Biological Opinions would still apply to the F-B LGA.

16.3.27 Chapter 10

On page 10-1 of the Draft Supplemental EIR/EIS, the following changes were made: (Volumes I-IV).

On page 10-1 of the Draft Supplemental EIR/EIS, the following changes were made: have been were

Public agencies that commented on the Draft Supplemental EIR/EIS were sent hard copies of this Final Supplemental EIR.

On page 10-1 of the Draft Supplemental EIR/EIS, the following text was removed:

Bakersfield: Kern County Clerk, 1115 Truxtun Avenue, Bakersfield, CA
Phone: (661) 868-3588
Contact: Mary Bedard, County Clerk

On page 10-2 of the Draft Supplemental EIR/EIS, the following text was added:

Bakersfield: Kern County Library, Baker Branch, 1400 Baker Street, Bakersfield, CA
Phone: (661) 961-2390
Contact: Melanie Black, Branch Supervisor

On page 10-2 of the Draft Supplemental EIR/EIS, the following changes were made:  Mary Diaz, Jennifer Yank

On page 10-2 of the Draft Supplemental EIR/EIS, the following changes were made: Amanda Norman, Jeremy Tobias, Chief Assistant to the Executive Director

On page 10-2 of the Draft Supplemental EIR/EIS, the following changes were made: Lisa Gonzalez, Sonia Quill, Recreation-Community Services Supervisor

On page 10-2 of the Draft Supplemental EIR/EIS, the following text was removed:

Bakersfield: Kern County Library, Baker Branch, 1400 Baker Street, Bakersfield, CA
Phone: (661) 861-2390

David Tapia

### 16.3.28 Chapter 11

On page 11-1 of the Draft Supplemental EIR/EIS, the following rows were added to the table showing California High-Speed Rail Authority preparers:

<table>
<thead>
<tr>
<th>Position</th>
<th>Name</th>
<th>Experience/Qualifications</th>
</tr>
</thead>
<tbody>
<tr>
<td>Chief Executive Officer</td>
<td>Brian P. Kelly</td>
<td>23 years of experience, BA, Government-Journalism, California State University, Sacramento</td>
</tr>
<tr>
<td>Deputy Environmental Project Manager</td>
<td>Audrey Van, AICP</td>
<td>7 years of experience, MS, Biology, Georgia Institute of Technology BS, Biology, Sonoma State University</td>
</tr>
</tbody>
</table>

On page 11-1 of the Draft Supplemental EIR/EIS, the following row was removed from the table showing California High-Speed Rail Authority preparers:

| Cultural Resource Specialist | Amy MacKinnon, M.A., RPA |

### 16.3.29 Chapter 12

On page 12-3 of the Draft Supplemental EIR/EIS, the following references were added:

[Reference](http://www.bakersfieldcity.us/civicax/filebank/blobdload.aspx?BlobID=28902)

On page 12-3 of the Draft Supplemental EIR/EIS, the following changes were made:

Chapter 16
Changes to the Final Report Resulting from Comments on the Draft Report

16.3.30 Chapter 13

There were no changes to Chapter 13 aside from the global changes described in Section 16.2 of this Chapter.

16.3.31 Chapter 14

Chapter 14 is an index of the entire document and has been updated according to the changes described above. Because the indexing is a function of Microsoft Word formatting, changes were not marked using strikethrough and highlighting.

16.3.32 Chapter 15

There were no changes to Chapter 15 aside from the global changes described in Section 16.2 of this Chapter.

16.4 Volume II

16.4.1 Cover

There were no changes to the Volume II Cover aside from the global changes described in Section 16.2 of this Chapter.
16.4.2 Title Page
Reference to NEPA cooperating agencies was removed from the Title Page of Volume II. Otherwise, there were no changes to the Volume II Title Page aside from the global changes described in Section 16.2 of this Chapter.

16.4.3 Appendix 1-A
There were no changes to Appendix 1-A aside from the global changes described in Section 16.2 of this Chapter.

16.4.4 Appendix 1-B
There were no changes to Appendix 1-B aside from the global changes described in Section 16.2 of this Chapter.

16.4.5 Appendix 2-A
There were no changes to Appendix 2-A aside from the global changes described in Section 16.2 of this Chapter.

16.4.6 Appendix 2-B
There were no changes to Appendix 2-B aside from the global changes described in Section 16.2 of this Chapter.

16.4.7 Appendix 2-C
There were no changes to Appendix 2-C aside from the global changes described in Section 16.2 of this Chapter.

16.4.8 Appendix 2-D
There were no changes to Appendix 2-D aside from the global changes described in Section 16.2 of this Chapter.

16.4.9 Appendix 2-E
There were no changes to Appendix 2-E aside from the global changes described in Section 16.2 of this Chapter.

16.4.10 Appendix 2-F
There were no changes to Appendix 2-F aside from the global changes described in Section 16.2 of this Chapter.

16.4.11 Appendix 2-G
There were no changes to Appendix 2-G aside from the global changes described in Section 16.2 of this Chapter.

16.4.12 Appendix 2-H
On page 2-H-6, the following rows were added to the Appendix table:

| GEO-IAMF #12: Engage a Paleontological Resources Specialist to Direct Monitoring during Construction | This obligation reduces potential impacts to paleontological resources by requiring the Contractor to designate a paleontological resource specialist (PRS) (approved by the Authority) who will be responsible for determining where and when paleontological resource monitoring should be conducted. The PRS will prepare a Paleontological Resource Monitoring and Mitigation Plan (PRMMP). It will define the scope and nature of the monitoring effort and will be reviewed and approved by the Authority. The PRS will document any paleontological discoveries, as needed, evaluate the potential resource, and assess the significance of the find. |
| GEO-IAMF #13: Prepare and Implement a Paleontological | This measure reduces potential impacts to paleontological resources by requiring the PRMMP contain a number of elements. These include: a description of when... |
Resource Monitoring and Mitigation Plan and where construction monitoring will be required; emergency discovery procedures; sampling and data recovery procedures; procedures for the preparation, identification, analysis, and curation of fossil specimens and data recovered; and procedures for reporting the results of the monitoring and mitigation program.

GEO-IAMF #14: Halt Construction When Paleontological Resources Are Found This commitment reduces potential impacts on paleontological resources discovered during construction by halting construction in the immediate area surrounding the found resource until an evaluation can be completed in accordance with the Paleontological Resource Monitoring and Mitigation Plan.

16.4.13 Appendix 3.1-A

16.4.14 Appendix 3.3-A
There were no changes to Appendix 3.3-A aside from the global changes described in Section 16.2 of this Chapter.

16.4.15 Appendix 3.3-B
There were no changes to Appendix 3.3-B aside from the global changes described in Section 16.2 of this Chapter.

16.4.16 Appendix 3.4-A
There were no changes to Appendix 3.4-A aside from the global changes described in Section 16.2 of this Chapter.
### Appendix 3.4-B

Starting on page 3.4-B-30, the following tables were added:

16.4.18 Appendix 3.4-C

There were no changes to Appendix 3.4-C aside from the global changes described in Section 16.2 of this Chapter.

16.4.19 Appendix 3.5-A

There were no changes to Appendix 3.5-A aside from the global changes described in Section 16.2 of this Chapter.

16.4.20 Appendix 3.6-A

There were no changes to Appendix 3.6-A aside from the global changes described in Section 16.2 of this Chapter.

16.4.21 Appendix 3.6-B

There were no changes to Appendix 3.6-B aside from the global changes described in Section 16.2 of this Chapter.
16.4.22 Appendix 3.6-C
There were no changes to Appendix 3.6-C aside from the global changes described in Section 16.2 of this Chapter.

16.4.23 Appendix 3.7-A
There were no changes to Appendix 3.7-A aside from the global changes described in Section 16.2 of this Chapter.

16.4.24 Appendix 3.7-B
On page 3.7-B-3, the following row was added to Attachment 2 Potential Acreage of Special-Status Wildlife Species Habitat Impacted by the May 2014 Project and the F-B LGA (acres):

| Blunt-nosed leopard lizard (AGS, VFR) | 0.70 | 0.30 | 3.62 | 5.32 |

16.4.25 Appendix 3.7-C
There were no changes to Appendix 3.7-C aside from the global changes described in Section 16.2 of this Chapter.

16.4.26 Appendix 3.8-A
There were no changes to Appendix 3.8-A aside from the global changes described in Section 16.2 of this Chapter.

16.4.27 Appendix 3.8-B
There were no changes to Appendix 3.8-B aside from the global changes described in Section 16.2 of this Chapter.

16.4.28 Appendix 3.11-A
There were no changes to Appendix 3.11-A aside from the global changes described in Section 16.2 of this Chapter.

16.4.29 Appendix 3.11-B
There were no changes to Appendix 3.11-B aside from the global changes described in Section 16.2 of this Chapter.

16.4.30 Appendix 3.12-A
There were no changes to Appendix 3.12-A aside from the global changes described in Section 16.2 of this Chapter.

16.4.31 Appendix 3.12-B
There were no changes to Appendix 3.12-B aside from the global changes described in Section 16.2 of this Chapter.

16.4.32 Appendix 3.12-C
On page 3.12-C-3, the following row was added to Table 3.12-C-2 Schools in the Study Area for the F-B LGA:

| Bethel Christian School | City of Bakersfield | Private |

16.4.33 Appendix 3.13-A
There were no changes to Appendix 3.13-A aside from the global changes described in Section 16.2 of this Chapter.
16.4.34 Appendix 3.14-A
There were no changes to Appendix 3.14-A aside from the global changes described in Section 16.2 of this Chapter.

16.4.35 Appendix 3.14-B
There were no changes to Appendix 3.14-B aside from the global changes described in Section 16.2 of this Chapter.

16.4.36 Appendix 3.14-C
There were no changes to Appendix 3.14-C aside from the global changes described in Section 16.2 of this Chapter.

16.4.37 Appendix 3.17-A
There were no changes to Appendix 3.17-A aside from the global changes described in Section 16.2 of this Chapter.

16.4.38 Appendix 3.19-A
On page 3.19-A-14, the text Draft EIR released January 2018 was added to Table A-3 Planned and Potential Projects and Plans – City of Bakersfield under “Status/Timing” for the F Street Station.

Appendix 3.19-A Figures 1-4 were also updated to include the Making Downtown Bakersfield Station Area Vision Plan boundary; see below.
16.4.39 Appendix 3.19-B

On page 3.19-B-4, Table B- 2 Planned Transportation Projects – Kern County, the Description of Map ID T#9 was revised in the following way: collector-local.

On page 3.19-B-7, the following rows were added to Table B- 3 Planned Transportation Projects – City of Bakersfield:
### Appendix 3.19-B

Figures 1-4 were amended to include the three additional projects in Table B-3, described above, as well as labels for the communities of Oildale and East Bakersfield; see below.
16.4.40 Appendix 5-A

There were no changes to Appendix 5-A aside from the global changes described in Section 16.2 of this Chapter.

16.4.41 Appendix 8-A

On page 8-A-3, Figure 8-A-1 F-B LGA and May 2014 Project had changed GIS pathways.

On page 8-A-7, Figure 8-A-2 Study Intersections at Bakersfield Station had changed GIS pathways.

On page 8-A-11, Figure 8-A-3 Existing Plus May 2014 Project: Average Daily Traffic and Number of Lanes: Map A had changed GIS pathways.

On page 8-A-12, Figure 8-A-4 Existing Plus May 2014 Project: Average Daily Traffic and Number of Lanes: Map B had changed GIS pathways.

On page 8-A-26, Figure 8-A-5a May 2014 Project Noise Impacts After Mitigation (Shafter) had changed GIS pathways.

On page 8-A-27, Figure 8-A-5b May 2014 Project Noise Impacts After Mitigation (Bakersfield) had changed GIS pathways.

On page 8-A-28, land use types were indented in Table 8-A-7 to show the difference between the comparative noise and vibration impacts.

On page 8-A-31, Figure 8-A-6 Electromagnetic Field Sensitive Receptors Along the May 2014 Project had changed GIS pathways.

On page 8-A-41, Figure 8-A-11 U.S. Bureau of Reclamation Lands had changed GIS pathways.

On page 8-A-45, Figure 8-A-12 May 2014 Project Habitat Study Areas (Shafter) had changed GIS pathways.

On page 8-A-46, Figure 8-A-13 May 2014 Project Habitat Study Areas (Bakersfield) had changed GIS pathways.

On page 8-A-49, the following row was added to Table 8-A-15 Potential Acreage of Special-Status Wildlife Species Habitat Impacted by the May 2014 Project:

<table>
<thead>
<tr>
<th>Blunt-nosed leopard lizard</th>
<th>AGS, VFR</th>
<th>0.70</th>
<th>0.30</th>
</tr>
</thead>
</table>

On page 8-A-50, the following change was made to the bullet Special-Status Reptiles: The May 2014 Project contains suitable habitat for special-status reptiles, including coast horned lizard and blunt-nosed leopard lizard.

On page 8-A-52, Figure 8-A-14 Waters near the May 2014 Project (Shafter) had changed GIS pathways.

On page 8-A-53, Figure 8-A-15 Waters near the May 2014 Project (Bakersfield) had changed GIS pathways.

On page 8-A-56, Figure 8-A-16 Conservation Areas had changed GIS pathways.

On page 8-A-58, Figure 8-A-17 Kern River Linkage had changed GIS pathways.

On page 8-A-61, the following row was added to Table 8-A-20 Potential Acreage of Special-Status Wildlife Species Habitat Impacted by the May 2014 Project and the F-B LGA (acres):

| Blunt-nosed leopard lizard (AGS, VFR) | 0.70 | 0.30 | 3.62 | 5.32 |
In the first paragraph on Page 8-A-62, the following changes were made: Only one of the special-status wildlife species (silvery legless lizard and blunt-nosed leopard lizard) listed above would have less permanent and temporary impacts with the implementation of the May 2014 Project.

On page 8-A-68, Figure 8-A-18 Water Districts Serving the May 2014 Project and the F-B LGA Areas had changed GIS pathways.

On page 8-A-71, Figure 8-A-19 Flood Zones Crossing the May 2014 Project and the F-B LGA had changed GIS pathways.

On page 8-A-81, Figure 8-A-20 May 2014 Project and Safety-Related Facilities (Shafter) had changed GIS pathways.

On page 8-A-82, Figure 8-A-21 May 2014 Project and Safety-Related Facilities (Bakersfield) had changed GIS pathways.

On page 8-A-90, in the first paragraph under the heading Community Facilities, the following changes were made to the text: several businesses and ancillary facilities associated with the Mercy Hospital medical complex the Mercy Medical Plaza.

On page 8-A-96, the following text changes were made to footnote 1 of Table 8-A-45 Comparison of Annual Property Tax Losses by Jurisdiction under the F-B LGA, relative to the May 2014 Project (in 2015 dollars): Negative Positive values indicate that the F-B LGA has less more of an impact than the May 2014 Project, negative values indicate that the F-B LGA has less of an impact than the May 2014 Project.

On page 8-A-97, the following text changes were made to footnote 1 of Table 8-A-46 Comparison of Annual Sales Tax Losses by Jurisdiction under the F-B LGA, relative to the May 2014 Project (in 2015 dollars): Negative Positive values indicate that the F-B LGA has less more of an impact than the May 2014 Project, negative values indicate that the F-B LGA has less of an impact than the May 2014 Project.

On page 8-A-99, the following text was added to the last paragraph: Additionally, the May 2014 Project would result in 845 more one-year full-time job equivalents, with 445 of them being direct and 400 being indirect or induced.

On page 8-A-134, the following text was added to the F-B LGA Construction and Operations Impacts column for Socioeconomics and Communities resources in Table 8-A-62 Cumulative Impacts for the Comparison between the May 2014 Project and F-B LGA: Environmental Justice cumulative impacts are therefore discussed in Chapter 5 of this Supplemental EIR/EIS and are not applicable for the impacts considered here.

On page 8-A-145, the following changes were made under subsection Community Division and/or Disruption: The May 2014 Project would have a substantial effect on Bakersfield High School, which is attended by predominantly minority and low-income students. Further, the May 2014 Project would also displace the Bakersfield Homeless Center, which serves low-income families, as well as the Mercado, which serves a minority community, and several buildings of the Mercy Hospital medical complex, which has programs dedicated to low-income communities.

On page 8-A-150, the following text changes were made to the third row, second column of Table 8-A-67 Capital Cost of the Fresno to Bakersfield Section: Only item in this category for the Fresno to Bakersfield Section is the HMF if an alternative site in this section is selected. The cost estimate for the HMF is provided in the Final EIR/EIS.

On page 8-A-150, the following text was removed from the footnotes of Table 8-A-68: HMF = heavy maintenance facility.

On page 8-A-150, the following changes were made to the text below Table 8-A-69: As shown in the table, costs for the May 2014 Project range from $241 million, with higher fares and no HMF, to $335 million, with lower fares and an HMF facility (2010 dollars).

On page 8-A-156, the following table was added:
Table 8-A-74 Design Features of the F-B LGA and May 2014 Project

<table>
<thead>
<tr>
<th>Design Option</th>
