

# FRESNO TO BAKERSFIELD HIGH-SPEED TRAIN PROJECT

## Public Information Meeting

Please join us at our public information meeting where you can learn about next steps in the environmental review of the Fresno to Bakersfield section of the California High-Speed Train project. The California High Speed Rail Authority has received numerous letters and comments regarding the different alignments in this section. The information we have gathered on the alignments will be considered in the alternatives that will be carried forward in the Environmental Impact Report/Statement (EIR/EIS). The proposed 800-mile high-speed train system will provide Californians with a fast, safe, reliable and environmentally-friendly transportation alternative, linking all major cities in the state. For more information, please call Bart Bohn at 559-256-1470, or visit [www.cahighspeedrail.ca.gov](http://www.cahighspeedrail.ca.gov)

All buildings are handicap accessible

Un intérprete de habla hispana estará presente durante la reunión.
