High-Speed Rail Project Helps a Modesto-Based Small Business Grow and Prosper

SACRAMENTO, Calif. – O'Dell Engineering is a Modesto-based certified small business that is working on the high-speed rail program doing right-of-way and surveying. The company began working on high-speed rail as a subcontractor in 2011, but since has become a prime contractor and has seen its workforce grow from 15 employees to 55. Watch the video to learn the other ways getting involved with high-speed rail has positively impacted the company and why it plans to work on the project for as long as possible.
