May 2020
Abstract: The Burbank to Los Angeles Project Section: Draft Environmental Impact Report/Environmental Impact Statement was prepared as a joint document to meet all pertinent requirements of both the California Environmental Quality Act (CEQA) and the National Environmental Policy Act (NEPA). Following NEPA Assignment in July 2019, the California High-Speed Rail Authority has assumed the role of federal lead agency on the project. Specifically, the environmental review, consultation, and other actions required by applicable federal environmental laws for this project are being or have been carried out by the State of California pursuant to 23 U.S.C. 327 and a Memorandum of Understanding (MOU) dated July 23, 2019, and executed by the Federal Railroad Administration and the State of California. Prior to the July 23, 2019 MOU, the Federal Railroad Administration was the federal lead agency.

This document considers, describes, and summarizes at a project level of analysis the environmental impacts of a proposed high-speed rail (HSR) system for intercity travel between Burbank and Los Angeles, California, that connects to the larger statewide HSR system. One end-to-end Build Alternative and a No Project Alternative are analyzed.
