1 PROJECT PURPOSE, NEED, AND OBJECTIVES ................................................................. 1-1
1.1 Introduction .............................................................................................................. 1-1

1.1.1 The High-Speed Rail System ................................................................................. 1-1
# Table of Contents

1.1.2 The Decision to Develop a Statewide High-Speed Rail System ......................................................................................... 1-3
1.1.3 Implementation of the Statewide High-Speed Rail System ................................................................................. 1-4
1.1.4 The San Jose to Merced Project Section ........................................................................................................ 1-9
1.1.5 Lead Agencies, Cooperating Agencies, and Responsible Agencies ............................................................................. 1-10
1.1.6 Compatibility with Federal Transportation Policy ........................................................................... 1-11

1.2 Purpose of and Need for the High-Speed Rail System and the San Jose to Merced Project Section ........................................................................................................ 1-12
1.2.1 Purpose of the High-Speed Rail System ........................................................................................................ 1-12
1.2.2 Purpose of the San Jose to Merced Project Section ......................................................................................... 1-12
1.2.3 CEQA Project Objectives of the High-Speed Rail System in California and in the San Jose to Merced Project Section Area ........................................................................ 1-13
1.2.4 Statewide and Regional Need for the High-Speed Rail System in the San Jose to Merced Project Section Area ........................................................................................................ 1-13

1.3 Relationship to Other Agency Plans, Policies, and Programs ......................................................................................... 1-32
1.3.1 California Transportation Plan 2040 ........................................................................................................ 1-32
1.3.2 Plan Bay Area 2040 ........................................................................................................................................ 1-32
1.3.3 San Francisco Bay Area Regional Rail Plan ........................................................................................................ 1-32
1.3.4 MTC Resolution No. 4056 Memorandum of Understanding ........................................................................... 1-33
1.3.5 Valley Transportation Plan 2040 ........................................................................................................ 1-33
1.3.6 Caltrain Strategic Plan 2015–2024 ........................................................................................................ 1-34
1.3.7 On the Move—San Benito Regional Transportation Plan (2018–2040) ........................................................................................................ 1-34
1.3.8 San Joaquin Valley Blueprint Roadmap Summary ........................................................................................................ 1-34
1.3.9 San Joaquin Corridor Strategic Plan ........................................................................................................ 1-35
1.3.10 Regional Transportation Plan and Sustainable Communities Strategy for Merced County ........................................................................................................ 1-35
1.3.11 Madera County Transportation Commission 2018 Regional Transportation Plan ........................................................................................................ 1-36
1.3.12 ACE Extension Lathrop to Ceres/Merced ........................................................................................................ 1-36
1.3.13 Valley Link ....................................................................................................................................................... 1-37
1.3.14 Capitol Corridor 2014 Vision Plan Update ........................................................................................................ 1-37
1.3.15 Bay Area Rapid Transit Vision Update ........................................................................................................ 1-37
1.3.16 San Jose International Airport Master Plan ........................................................................................................ 1-38
1.3.17 Oakland International Airport ...................................................................................................................... 1-38

1.4 Relationship to Other Transportation Projects in the Study Area ......................................................................................... 1-38
1.4.1 Caltrain Modernization Program ........................................................................................................ 1-38
1.4.2 Caltrain South Terminal Phases II and III ........................................................................................................ 1-39
1.4.3 Caltrain Grade Separations in Santa Clara County ............................................................................................ 1-39
1.4.4 Bay Area Rapid Transit Silicon Valley Extension ......................................................................................... 1-39
1.4.5 Silicon Valley Express Lanes ........................................................................................................................ 1-40
1.4.6 ACE Extension Lathrop to Ceres/Merced ........................................................................................................ 1-40
1.4.7 Valley Link ....................................................................................................................................................... 1-40
1.4.8 San Jose International Airport Automated People Mover Connector ........................................................................................................ 1-40
1.4.9 Bus Rapid Transit ................................................................................................................................................ 1-40
1.4.10 Double-Track Segments of the Caltrain Line between San Jose and Gilroy ........................................................................................................ 1-41
1.4.11 Monterey County Rail Extension ........................................................................................................ 1-41
# Table of Contents

## 2 ALTERNATIVES

2.1 Introduction ............................................................................................................ 2-1
2.2 Independent Utility ................................................................................................ 2-5
2.3 Background .............................................................................................................. 2-5
2.4 HSR System Infrastructure ...................................................................................... 2-5
   2.4.1 System Design Performance, Safety, and Security .............................................. 2-6
   2.4.2 Vehicles .............................................................................................................. 2-7
   2.4.3 Stations ............................................................................................................... 2-8
   2.4.4 Infrastructure Components .................................................................................. 2-12
   2.4.5 Grade Separations .............................................................................................. 2-18
   2.4.6 At-Grade Crossings ............................................................................................ 2-22
   2.4.7 Traction Power Distribution .............................................................................. 2-23
   2.4.8 Network Upgrades ............................................................................................. 2-26
   2.4.9 Signaling and Train-Control Elements ............................................................... 2-26
   2.4.10 Track Structure ................................................................................................. 2-27
   2.4.11 Maintenance Facilities ....................................................................................... 2-27
2.5 Alternatives Considered during Alternatives Screening Process ......................... 2-28
2.6 Alignments, Station Sites, and Maintenance Facilities Evaluated in this Draft EIR/EIS 2-35
   2.6.1 No Project Alternative—Planned Improvements ................................................. 2-35
   2.6.2 San Jose to Central Valley Wye Project Alternatives .......................................... 2-45
2.7 Ridership .................................................................................................................. 2-127
   2.7.1 Travel Demand and Ridership Forecasts ............................................................. 2-127
   2.7.2 Ridership and HSR System Design .................................................................... 2-128
   2.7.3 Ridership and Environmental Impact Analysis ................................................... 2-129
   2.7.4 Ridership and Station Area Parking .................................................................. 2-129
2.8 Operations and Service Plan .................................................................................... 2-130
   2.8.1 HSR Service ...................................................................................................... 2-130
   2.8.2 Maintenance Activities ...................................................................................... 2-132
2.9 Additional High-Speed Rail Development Considerations ..................................... 2-133
   2.9.1 High-Speed Rail, Land Use Patterns, and Development Around High-Speed Rail Stations ................................................................. 2-133
   2.9.2 Right-of-Way Acquisition for Construction, Operations, and Maintenance of High-Speed Rail ......................................................................................... 2-134
2.11 Construction Plan .................................................................................................. 2-135
   2.11.1 General Approach ............................................................................................. 2-136
   2.11.2 Pre-Construction Activities .............................................................................. 2-139
   2.11.3 Major Construction Activities ........................................................................ 2-145
2.12 Permits .................................................................................................................... 2-156

## 3 AFFECTED ENVIRONMENT, ENVIRONMENTAL CONSEQUENCES, AND MITIGATION MEASURES

3.1 Introduction .............................................................................................................. 3.1-1
   3.1.1 Federal and State Regulatory Context ................................................................. 3.1-1
   3.1.2 State and Regional Policy Context ..................................................................... 3.1-2
   3.1.3 Chapter 3 Purpose ............................................................................................. 3.1-3
   3.1.4 Chapter 3 Organization ..................................................................................... 3.1-4
   3.1.5 Chapter 3 Content ............................................................................................ 3.1-5
   3.1.6 Outreach to Local Agencies .............................................................................. 3.1-13
   3.1.7 Legal Authority to Implement Off-Site Mitigation ........................................... 3.1-14

  4.4 Alternatives......................................................................................... 4-11
    4.4.1 No Project Alternative................................................................. 4-13
    4.4.2 Alternative 1............................................................................... 4-13
    4.4.3 Alternative 2............................................................................... 4-14
    4.4.4 Alternative 3............................................................................... 4-14
    4.4.5 Alternative 4............................................................................... 4-15
### 4.5 Section 4(f) Applicability Analysis

4.5.1 Parks, Recreation, and Wildlife and Waterfowl Refuges

4.5.2 Cultural Resources

### 4.6 Preliminary Section 4(f) Use Assessment

4.6.1 Parks, Recreation, and Wildlife and Waterfowl Refuges

4.6.2 Cultural Resources

### 4.7 Avoidance Alternatives

4.7.1 Individual Resource Avoidance Assessments

### 4.8 Measures to Minimize Harm

### 4.9 Section 4(f) Least Harm Analysis

4.9.1 Least Harm Analysis for San Jose to Central Valley Wye Project Alternatives

4.9.2 Net Harm to Section 4(f) Property

4.9.3 Impacts on Environmental Resources Outside of Section 4(f) Uses

### 4.10 Section 6(f)

### 5 ENVIRONMENTAL JUSTICE

5.1 Introduction

5.1.1 Definition of Resources

5.2 Laws, Regulations, and Orders

5.2.1 Federal

5.2.2 State

5.2.3 Regional and Local

5.3 Methods for Evaluating Effects

5.3.1 Definition of Reference Community and Resources Study Area

5.3.2 Methods for Effects Analysis

5.4 Affected Environment

5.4.1 Overview

5.4.2 Low-Income Populations

5.4.3 Minority Populations

5.4.4 Other Sensitive Populations

5.5 Environmental Justice Engagement and Documentation

5.5.1 Affected Populations and Communities

5.5.2 Issues and Concerns

5.6 Assessment of Effects

5.6.1 Overview

5.6.2 No Project Alternative

5.6.3 Project Alternatives

5.7 Summary of Disproportionately High and Adverse Effects Prior to Consideration of Measures to Minimize Harm

5.8 Measures to Minimize Harm

5.9 California High-Speed Rail Authority’s Draft Environmental Justice Determination

### 6 PROJECT COSTS AND OPERATIONS

6.1 Introduction

6.2 Capital Costs

6.2.1 High-Speed Rail Alternatives

6.2.2 Maintenance of Way Facilities and Sidings

6.3 Operation and Maintenance Costs
7 OTHER CEQA/NEPA CONSIDERATIONS ........................................ 7-1
  7.1 Unavoidable Adverse and Significant and Unavoidable Impacts .......... 7-1
    7.1.1 Adverse Effects that Cannot Be Avoided under NEPA ............ 7-1
    7.1.2 Significant and Unavoidable Impacts under CEQA .............. 7-3
  7.2 Project Benefits ................................................................ 7-5
    7.2.1 Transportation Benefits ............................................ 7-5
    7.2.2 Environmental Benefits ............................................. 7-5
    7.2.3 Economic and Employment Benefits ............................... 7-5
  7.3 Relationship between Short-Term Use of the Environment and the .... 7-5
    Enhancement of Long-Term Productivity ................................ 7-5
  7.4 Significant Irreversible Environmental Changes or Irretrievable .... 7-6
    Commitment of Resources .................................................. 7-6

8 PREFERRED ALTERNATIVE .................................................... 8-1
  8.1 Introduction ................................................................. 8-1
  8.2 Summary of Key Stakeholder Input ..................................... 8-4
    8.2.1 Local Communities .................................................... 8-4
    8.2.2 Native American Tribes .............................................. 8-5
    8.2.3 Agricultural Interests ................................................. 8-6
    8.2.4 Businesses ............................................................... 8-6
    8.2.5 Environmental Organizations ....................................... 8-6
    8.2.6 Environmental Justice Outreach .................................... 8-6
    8.2.7 Agency Consultation .................................................... 8-7
    8.2.8 Feedback on the Staff-Recommended Preferred Alternative ........ 8-9
  8.3 Alternatives Considered .................................................. 8-9
  8.4 Preferred Alternative ..................................................... 8-10
    8.4.1 Review of Alternative Key Differentiators by Subsection ....... 8-14
    8.4.2 Preliminary Cost Estimate by Alternative ........................ 8-18
    8.4.3 Additional Considerations ........................................... 8-18
    8.4.4 Alternative Comparison .............................................. 8-19
    8.4.5 Identification of the Preferred Alternative ....................... 8-20
  8.5 Environmentally Superior Alternative .................................. 8-24
  8.6 Environmentally Preferable Alternative ................................ 8-24
  8.7 Least Environmentally Damaging Practicable Alternative ........... 8-24

9 PUBLIC AND AGENCY INVOLVEMENT ...................................... 9-1
  9.1 Environmental Justice Outreach ......................................... 9-1
    9.2.1 Notices of Preparation, Notices of Intent, and Public ......... 9-2
      Information Materials ................................................. 9-2
    9.2.2 Scoping Meetings .................................................... 9-2
    9.2.3 Scoping Comments ..................................................... 9-4
  9.3 Alternatives Analysis Process (2010–2016) ............................ 9-4
    9.3.1 Public Information Meetings and Materials during the ......... 9-4
      Alternatives Analysis Process ........................................ 9-4
    9.3.2 Technical Working Group Meetings during the Alternatives .. 9-12
      Analysis Process ......................................................... 9-12
    9.3.3 Environmental Resource Agency Meetings during the ......... 9-12
      Alternatives Analysis Process ........................................ 9-12
