

CALIFORNIA High-Speed Rail Authority

PUBLIC SCOPING MEETING NOTICE

San Francisco to San Jose Project Section

The California High-Speed Rail Authority is responsible for planning, designing, building and operating the first high-speed rail system in the nation. California high-speed rail will connect the mega-regions of the state, contribute to economic development and a cleaner environment, create jobs, and preserve agricultural and protected lands. By 2029, the system will run from San Francisco to the Los Angeles basin in under three hours at speeds capable of over 200 miles per hour. The system will eventually extend to Sacramento and San Diego, totaling 800 miles with up to 24 stations. In addition, the Authority is working with regional partners to implement a statewide rail modernization program that invests billions of dollars in local and regional rail lines to meet the state's 21st century transportation needs.

The **San Francisco to San Jose Project Section** is part of the first phase of the California high-speed rail system connecting the cities of San Francisco, Millbrae (San Francisco Airport) and San Jose on an electrified Caltrain Corridor with proposed stations at 4th and King and/or Transbay Transit Center, near the San Francisco Airport (Millbrae), and San Jose.

The approximately 51-mile project section is planned to be a blended system which will support a modernized Caltrain service and high-speed rail service primarily on shared tracks. This approach minimizes impacts on surrounding communities, reduces project cost, improves safety and expedites implementation.

The Public Scoping Meetings are being held to provide the public an opportunity to learn about the project, ask questions and submit feedback.
